

Computer Science Education Week

This year, the 9th annual Computer Science Education Week (CSEd Week) takes place to promote the importance of computer science around the world. Children of all ages are encouraged to take an interest in computer science and learn more about how it affects our lives every day and how they can become involved. There are activities to find out more and try your hand at coding through the Hour of Code.

What is it?

In 2017, Computer Science Education Week is the 4th to the 10th December. The week is held in the week of Admiral Grace Murray Hopper's birthday on 9th December in recognition of her achievements in computer science. Grace Hopper was a pioneering computer programmer who lived and worked in the USA in the middle of the 20th century. The week aims to inspire children to learn about computer science as well as establishing computer science as a core subject in schools, to be taught to all children just like chemistry and biology. In addition, there is a focus on encouraging underrepresented groups, such as women and ethnic minorities, to study computer science. The Association for Computing Machinery founded CSEd Week in 2009 to highlight the critical role of computing in all careers. At the time, numbers of students choosing to study Computer Science at University were falling and CSEd Week aims to tackle that. Although the first CSEd Week aimed at changing government policy on computer science, it has since developed into a wider event which targets children, teachers, employers and university staff to raise the profile of computer science and promote the career opportunities open to computer programmers.

Did You Know?

Grace Hopper applied to join the US Navy at the beginning of the Second World War but was turned down because her job as a mathematician was too important for the war effort and at 34, she was considered too old.
