Handbook of Research on Current Trends in Asian Economics, Business, and Administration Akkaya, Bülent, Jermisittiparsert, Kittisak, Gunsul, Ayse, 2021-10-08 Social sciences have always been an important tool that enables human beings to examine and understand society. Through social sciences, researchers gain understandings of social phenomena and changes by providing commentaries, producing explanations, and attempting to synthesize a diversity of information sets to formulate theories. Since the concept of change has been the hallmark of the new millennium, researchers have witnessed a transformation in every aspect of the modern world at an ever-increasing speed, particularly in the social facet of human life. Ways of thinking that had previously been upheld and taught may therefore no longer be appropriate or effective as tools to understand contemporary phenomena and changes. The Handbook of Research on Current Trends in Asian Economics, Business, and Administration is a critical reference source that examines different aspects of social sciences, management, sociology, and education to better understand today's society and social life in the Asian context. The book identifies trends, impacts, and implications of disruptive technologies for business and socio-economic development, as well as strategic advantage on different levels of business and administration. Covering topics that include e-commerce, green management, information technology, economic growth, and distance learning, this book is essential for economists, academicians, government officials, policymakers, social scientists, managers, leaders, behavioral scientists, academicians, researchers, and students.
