## **Roblox Adventure Reviews For Adults:**

*Netflix, Dark Fantastic Genres and Intergenerational Viewing* Djoymi Baker, Jessica Balanzategui, Diana Sandars, 2023-07-04 Focusing on Netflix's child and family orientated platform exclusive content this book offers the first exploration of a controversial genre cycle of dark science fiction horror and fantasy television under Netflix's Family Watch Together TV tag. Using a ground breaking mix of methods including audience research interface and textual analysis the book demonstrates how Netflix is producing dark family telefantasy content that is both reshaping child and family friendly TV genres and challenging earlier broadcast TV models around child appropriate family viewing. It illuminates how Netflix encourages family audiences to watch together through intergenerational dynamics that work on and offscreen. The chapters in this book explore how this Netflixication of family television developed across landmark examples including Stranger Things, A Series of Unfortunate Events, The Dark Crystal, Age of Resistance and even Squid Game. The book outlines how Netflix is consolidating a new dark family terrain in the streaming sector which is unsettling older concepts of family viewing leading to considerable audience and critical confusion around target audiences and viewer expectations. This book will be of particular interest to upper level undergraduates, graduates and scholars in the fields of television studies, screen genre studies, childhood studies and cultural studies.

**Software Engineering, Artificial Intelligence, Networking and Parallel/Distributed Computing** Roger Lee, 2022-11-18 This book presents scientific results of the 23rd ACIS International Summer Virtual Conference on Software Engineering, Artificial Intelligence, Networking and Parallel Distributed Computing (SNPD2022 Summer) which was held on July 4-6, 2022 at Kyoto City, Japan. The aim of this conference was to bring together researchers and scientists, businessmen and entrepreneurs, teachers, engineers, computer users and students to discuss the numerous fields of computer science and to share their experiences and exchange new ideas and information in a meaningful way. Research results about all aspects (theory, applications and tools) of computer and information science and to discuss the practical challenges encountered along the way and the solutions adopted to solve them. The conference organizers selected the best papers from those papers accepted for presentation at the workshop. The papers were chosen based on review scores submitted by members of the program committee and underwent further rigorous rounds of review. From this second round of review, 15 of most promising papers are then published in this Springer SCI book and not the conference proceedings. We impatiently await the important contributions that we know these authors will bring to the field of computer and information science.
