Nelson Zagalo, 2020-03-17 Interactive media designers have been discussing modes to optimize interaction design beyond  
mere usability With the arrival of Emotional Design followed by the success of the User Experience UX approaches the  
discussion continued and augmented Experience has become a complex buzzword which is more about the subject s  
experience than the product and this is why it s difficult or even impossible to define it in a concise manner We propose to  
move the discussion from Experience towards Engagement to emphasize the design of the relationship between artefacts  
contexts and users Engagement asks for a more concrete type of experience with specific needs motives skills and  
competences which can be more clearly worked into the design of artefacts Engagement also differs from other concepts e g  
fun enjoyment happiness or well being and is open enough to grant freedom to designers in creating their personal world  
views To push this new approach we offer in this book a full model for the design of engagement in interactive media still  
believing it can be applied beyond that The model is arranged around what we call the three engagement streams
