QUOTES FROM THE BOOK

The metaverse is the next iteration of the internet we have been building for the last 40 years but in a 3D realm vs the text picture and video web we have today When it arrives in the next 5 10 years it will encompass all facets of our lives from school to work to play and everything in between And from now to then there will be many rocky roads as the world and China figure out how to actually build such a solution and all the rules needed to properly operate it

Alvin Wang Graylin China President Global VP of Corporate Development at HTC

Some people believe there should be one metaverse where many virtual worlds exist inside that one mega metaverse But this is the most idealized version of how society or the internet operates Judging by what tech companies are doing at this early stage it is clear that they want to keep their walled gardens up for as long as they can

Nina Xiang Author of Parallel Metaverses
