*The Causes and Consequences of Income Tax Noncompliance* Jeffrey A. Dubin, 2011-12-02 Taxpayer compliance is a voluntary activity and the degree to which the tax system works is affected by taxpayers knowledge that it is their moral and legal responsibility to pay their taxes Taxpayers also recognize that they face a lottery in which not all taxpayer noncompliance will ever be detected In the United States most individuals comply with the tax law yet the tax gap has grown significantly over time for individual taxpayers The US Internal Revenue Service attempts to ensure that the minority of taxpayers who are noncompliant pay their fair share with a variety of enforcement tools and penalties The Causes and Consequences of Income Tax Noncompliance provides a comprehensive summary of the empirical evidence concerning taxpayer noncompliance and presents innovative research with new results on the role of IRS audit and enforcements activities on compliance with federal and state income tax collection Other issues examined include to what degree taxpayers respond to the threat of civil and criminal enforcement and the important role of the media on taxpayer compliance This book offers researchers students and tax administrators insight into the allocation of taxpayer compliance enforcement and service resources and suggests policies that will prevent further increases in the tax gap The book s aggregate data analysis methods have practical applications not only to taxpayer compliance but also to other forms of economic behavior such as welfare fraud

**Economic and financial issues in the post-covid-19 world: Implications and role of public health** Giray Gozgor, Chi Lau, 2023-02-13 [The Encyclopedia of Public Choice](#) Charles Rowley, Friedrich Schneider, 2008-01-25 The Encyclopedia provides a detailed and comprehensive account of the subject known as public choice However the title would not convey sufficiently the breadth of the Encyclopedia s contents which can be summarized better as the fruitful interchange of economics political science and moral philosophy on the basis of an image of man as a purposive and responsible actor who pursues his own objectives as efficiently as possible

This fruitful interchange between the fields outlined above existed during the late eighteenth century during the brief period of the Scottish Enlightenment when such great scholars as David Hume Adam Ferguson and Adam Smith contributed to all these fields and more However as intell tual specialization gradually replaced broad based scholarship from the m nineteenth century onwards it became increasingly rare to find a scholar making major contributions to more than one Once Alfred Marshall defined economics in neoclassical terms as a n row positive discipline the link between economics political science and moral philosophy was all but severed and economists redefined their role into that of the humble dentist providing technical economic information as inputs to improve the performance of impartial benevolent and omniscient governments in their attempts to promote the public interest This indeed was the dominant view within an economics profession that had become besotted by the economics of John Maynard Keynes and Paul Samuelson immediately following the end of the Second World War
