**International Handbook of Research in History, Philosophy and Science Teaching** Michael R. Matthews, 2014-07-03 This inaugural handbook documents the distinctive research field that utilizes history and philosophy in investigation of theoretical curricular and pedagogical issues in the teaching of science and mathematics It is contributed to by 130 researchers from 30 countries it provides a logically structured fully referenced guide to the ways in which science and mathematics education is informed by the history and philosophy of these disciplines as well as by the philosophy of education more generally The first handbook to cover the field it lays down a much needed marker of progress to date and provides a platform for informed and coherent

future analysis and research of the subject The publication comes at a time of heightened worldwide concern over the standard of science and mathematics education attended by fierce debate over how best to reform curricula and enliven student engagement in the subjects There is a growing recognition among educators and policy makers that the learning of science must dovetail with learning about science this handbook is uniquely positioned as a locus for the discussion The handbook features sections on pedagogical theoretical national and biographical research setting the literature of each tradition in its historical context It reminds readers at a crucial juncture that there has been a long and rich tradition of historical and philosophical engagements with science and mathematics teaching and that lessons can be learnt from these engagements for the resolution of current theoretical curricular and pedagogical questions that face teachers and administrators Science educators will be grateful for this unique encyclopaedic handbook Gerald Holton Physics Department Harvard University This handbook gathers the fruits of over thirty years research by a growing international and cosmopolitan community Fabio Bevilacqua Physics Department University of Pavia

The Assessment Debate Valerie J. Janesick, 2001-11-14 An authoritative reference on one of education's hottest topics describing how the latest testing and assessment tools can be used to help improve student performance In this comprehensive review of the wealth of techniques by which students can be assessed Valerie J. Janesick points out that the politics of schooling often gets in the way of student progress High stakes standardized testing is frequently based on poorly constructed unfair tests that encourage teaching to the test which actually impedes educational goals Authentic testing relies more on essays and writing samples performances demonstrations and role plays Although it is fairer and provides a measure of student growth and progress it requires more effort by teachers who also require extra training Besides discussing authentic assessment in detail The Assessment Debate includes a chronology an annotated directory of organizations supporting performance assessment a list of state coordinators for testing reform and state by state report cards

*Curriculum Trends* Valerie J. Janesick, 2003-09-05 Curriculum Trends is an authoritative exploration of curriculum history in America and the theory and foundations currently influencing school practices for pre K through 12th grade Curriculum Trends A Reference Handbook presents the most expansive up to date survey of curriculum development in the United States ranging from its history and the origins of the cry for higher standards to societal influences on schools and the legal challenges they face today Supported by examples illustrating both successful and failed school reforms critical developments of the past 25 years and their impacts including the rise of charter schools home schooling the standards movement high stakes testing and authentic assessment are carefully analyzed The first work to examine ethical concerns with multicultural and multilingual students also addresses professionalism in teaching and teacher education
