### PLANTING SEEDS

Planting seeds is like starting a tiny treasure hunt in your garden. Each seed is a promise of a new plant. We plant seeds in soil, the soft, dark earth that feeds the plants.

When you plant a seed, you need to give it water. Water helps the seed to wake up and start growing. The seed first sends a tiny root down into the soil to drink water and a little shoot up towards the sun.

Watching seeds grow is exciting! After a few days, you can see green shoots coming out of the soil. These shoots will grow into bigger plants, maybe flowers or vegetables. It's like magic happening right before your eyes.

Taking care of plants teaches us patience. Plants need time to grow. They also need sunlight and more water as they get bigger. It's fun to check on them every day to see how they change.
