Smith Minton also provide exceptional, reality-based applications that appeal to students' interests and demonstrate the elegance of math in the world around us. New features include: A new organization placing all transcendental functions early in the book and consolidating the introduction to L'Hopital's Rule in a single section; More concisely written explanations in every chapter; Many new exercises for a total of 7,000 throughout the book that require additional rigor not found in the 2nd Edition; New exploratory exercises in every section that challenge students to synthesize key concepts to solve intriguing projects; New commentaries Beyond Formulas that encourage students to think mathematically beyond the procedures they learn; New counterpoints to the historical notes Today in Mathematics that stress the contemporary dynamism of mathematical research and applications connecting past contributions to the present; An enhanced discussion of differential equations and additional applications of vector calculus.
