Thinking Critically through Digital Media Nik Peachey, Although the use of internet and digital materials in the language classroom has come a long way over the last 25 years still the vast majority of web based material that finds its way into the language classroom is used for information input or comprehension purposes The students interaction with the materials is as such largely passive with the teacher controlling the suitability of the materials selected and deciding what information the students will extract from it In Thinking Critically through Digital Media I have tried to build on this model but develop it and take it to deeper and more critical levels of analysis that go beyond the superficial linguistic level and help to develop students not only as English language speakers but as capable information literate participants in the global knowledge economy The book uses as its basis the development of key digital literacies These include the ability to understand visually presented data the ability collect and analyse data using a range of techniques and survey tools and the ability to create and deliver a range of presentation types using digital media tools Whilst developing these digital literacies students are also encouraged to assess the validity credibility and underlying bias of the information they study and are given a range of research tools and techniques for reassessing the information and evaluating how it fits within their personal framework of belief systems and values The book itself has four main chapters The first three chapters contain a range of activities that teachers can use with students to develop their abilities to understand and create infographics develop research polls and surveys and create and deliver presentations These activities give students hands on exposure to a range of recommended tools and develop students as active creators of information whilst developing their abilities to work collaboratively in digital online environments The fourth key chapter of the book is a collection of lesson plans that teachers can use to take students through a complete process from accessing their existing knowledge about a topic understanding new input examining how the information fits into their existing value scheme checking the credibility and validity of the information carrying out their own parallel research through social media to finally sharing and reevaluating what they have learned You can see an example of the classroom materials here <https://bit.ly/intro-extro-demo> I believe that the skills and abilities teachers can help students develop through the use of these materials are ones that are sadly lacking not only in the English language classroom but also in the general education of many students around the world Through the use of these materials I hope teachers can develop more actively and intellectually critical students who approach digital media with the ability not only to comprehend and consume information but also understand the possible bias motivation and underlying values of those creating the information I believe these skills and abilities are key to creating a more tolerant open minded and critically aware global society **10 Lessons in Digital Literacy** Nik Peachey, 2024-06-27 This book contains a collection of ten lesson plans each based around an authentic infographic The lessons move through the common stages of classroom discussion to help students access their existing knowledge and develop their spoken fluency through

comprehension tasks to help students develop the ability to understand text and visual data and on to digital research and presentation tasks to help students develop the ability question and check the credibility of information think more critically about the motivations behind it and to reformulate and integrate what they have discovered into their existing beliefs and opinions Each lesson ends with some form of creative output task such as a presentation article essay or infographic creation that enables students to share what they have learned The materials have been designed to work on desktop laptop and mobile devices They also include QR codes so that students can access the infographics on their mobile devices The lesson plans are not intended as a course but as projects and activities that can supplement existing course materials The lessons cover a range of topics including Advertising and how it influences us Body language and how to understand it Introverts and extroverts and how they differ Emotional intelligence and how it impacts on our relationships Facts about hair Happiness and what effects it Developing study skills The environment and waste caused by clothes manufacturing Daily habits of the world's wealthiest people The history of marriage and weddings Each lesson includes A Teachers guide with advice and answer key

Muslim Citizens in the West Miss Nina Markovic, Professor Samina Yasmeen, 2014-11-28 Drawing upon original case studies spanning North America Europe and Australia Muslim Citizens in the West explores how Muslims have been both the excluded and the excluders within the wider societies in which they live The book extends debates on the inclusion and exclusion of Muslim minorities beyond ideas of marginalisation to show that while there have undoubtedly been increased incidences of Islamophobia since September 2001 some Muslim groups have played their own part in separating themselves from the wider society The cases examined show how these tendencies span geographical ethnic and gender divides and can be encouraged by a combination of international and national developments prompting some groups to identify wider society as the other Muslim and non Muslim scholars and practitioners in political science social work history and law also highlight positive outcomes in terms of Muslim activism with relationship to their respective countries and suggest ways in which increasing tensions felt perceived or assumed can be eased and greater emphasis given to the role Muslims can play in shaping their place in the wider communities where they live Managing Multicultural Lives Pawan Dhingra, 2007 This book examines how second generation Asian American professionals bring together contrasting identities
