Multi-Voltage Vehicle Loop Detector  
Two Channel with Direction Indication

## Instruction Manual

The ULT-MVP-2 two channel vehicle loop detector senses metallic objects near an induction loop. This detector automatically adjusts from 12 VDC up to 240 VAC which eliminates the installer's need to match available power to an appropriately rated vehicle detector. The ULTRAMETER™ display makes set-up easy by displaying the optimum sensitivity setting required to detect a vehicle positioned near the loop. Ten sensitivity settings allow for fine adjustment of the detection level. The ULT-MVP-2 provides relay contact outputs indicating vehicle presence for each channel separately and AB logic for direction indication. The relay output for each channel may be set for pulse or presence, or the EMX exclusive feature, Detect-on-Stop™ (DOS™). The ULT-MVP-2 features automatic sensitivity boost (ASB) and infinite or normal (5 minute) presence. Four frequency settings provide flexibility in preventing crosstalk in multi-loop applications.

### Cautions and Warnings

This product is an accessory or part of a system. Install the ULT-MVP-2 according to instructions from the gate or door operator manufacturer. Comply with all applicable codes and safety regulations.
