

A person wearing a green dress stands with their back to the camera, arms outstretched horizontally. They are positioned in front of a bright sun that creates a strong lens flare with many thin, radiating lines of light. The background is a warm, golden-yellow field, possibly of grass or flowers, which is slightly out of focus. The overall mood is one of hope, freedom, and awakening.

Reference Publishing, Reference Reed, 1995-12 *Switched On* John Elder Robison, 2016-04-18 For the first time in my life I learned what it was like to truly know other people's feelings. It was as if I'd been experiencing the world in black and white all my life and suddenly I could see everything and particularly other people in brilliant beautiful colour. People with autism have trouble reading the unspoken signals of others. The conventional wisdom says they don't have the wiring in their brains to do it. But now thanks to astounding advances in brain mapping technologies a revolutionary new brain therapy called Transcranial Magnetic Stimulation (TMS) is being pioneered at Harvard Medical School. In *Switched On* we follow New York Times bestselling author and free range Aspergian John Elder Robison as he journeys towards having his emotional intelligence unlocked by this remarkable new treatment. Led by Harvard professor Dr Pascual Leone, TMS uses an electromagnetic field to induce signals in the outer layer of the brain to help autistic people develop the ability to read other people's unspoken emotional cues. Astonishingly, TMS represents a new frontier of scientific possibility for people with autism spectrum disorders as well as those living with depression, bipolar disorder and other conditions. John Robison's story of how he came to awaken the dormant pathways inside his mind is remarkably compelling and entirely unique, but this is also a book about the remarkable advances in the way we view and treat a variety of psychological conditions. *Switched On* is a real life *Flowers for Algernon* with a happy ending, a compelling memoir that blends Robison's brilliant storytelling and humour with cutting edge neuroscience, electronics and a little bit of rock and roll.

PRAISE FOR JOHN ELDER ROBINSON Writing with a simple eloquence that is by turns poignant and comic, Robison deftly weaves neuroscience into a compelling narrative. The Sydney Morning Herald Robison's approachable account is not only crystal clear but exciting and full of promise. The Listener **Unlocked** Susan Levin, 2015-03-03 A Poignant and Inspiring Story of a Family Whose Child Emerges from Autism *Unlocked* begins with a vivid depiction of the author's life with her autistic son Ben. Feelings of isolation, self-hate and even moments of hatred toward her own child in response to his behaviors as well as the impact on her marriage and younger daughter impel her to seek solutions for his condition. Through years of trial and error, Susan eventually discovers methods that bring about radical improvement in Ben. The story, however, is not just about Ben but also addresses Susan's own spiritual and psychological struggles and ultimate transformation as she and her husband watch Ben go in and out of autism. Through years of intermittent progress and frustrating steps backwards, Susan learns that loving Ben means embracing him as he is, day by day, rather than waiting to love him fully one day when he is cured. Told largely through anecdote, *Unlocked* is by turns heart-wrenching and joyful, hopeful and doubt-laden. As we follow young Ben's exploits into a new social world, our own hearts break as he stumbles but finally soar as he achieves his dream, genuine caring and reciprocal relationships with his peers. In the end, *Unlocked* is a story about family commitment and the power of embracing nonjudgmental love.
