Predicting the Winner Ira Chinoy, 2024-05 Winner of the Ray Hiebert History of Journalism Published Work Award The history of American elections changed profoundly on the night of November 4 1952 An outside the box approach to predicting winners from early returns with new tools computers was launched live and untested on the newest medium for news television Like exhibits in a freak show computers were referred to as electronic brains and mechanical monsters Yet this innovation would help fuel an obsession with numbers as a way of understanding and shaping politics It would engender controversy down to our own time And it would herald a future in which the public square would go digital The gamble was fueled by a crisis of credibility stemming from faulty election night forecasts four years earlier in 1948 combined with a lackluster presentation of returns What transpired in 1952 is a complex tale of responses to innovation which Ira Chinoy makes understandable via a surprising history of election nights as venues for rolling out new technologies refining methods of prediction and providing opportunities for news organizations to shine In *Predicting the Winner* Chinoy tells in detail for the first time the story of the 1952 election night a night with continuing implications for the way forward from the dramatic events of 2020 21 and for future election nights in the United States

*Requiem of a Spy* Chris Adams, 2010-07 THE FBI ARREST 12 RUSSIAN SPIES Newspaper headlines radio and television networks announced the startling news A dozen or more undocumented Russian agents were caught operating undercover within the United States This event might well have occurred back during the last Millennia and did but this is 2010 the Cold War has been over for almost twenty years or has it Were we surprised After all the President of the United States had within the previous week of the arrests hosted the President of Russia to an Official State Visit As this book enters the final publication phase I could not have created a more perfect although factually unsettling introduction to the exciting and factual story which you are about to begin The most powerful and aggressive intelligence and secret police organizations in the world have for centuries belonged to Russia and during the Cold War the Soviet Union The long and sordid history of Russian secret police operations and tactics dates back to the 17th Century and Ivan the Terrible The Soviets known for their paranoia and mackorova masquerade frequently renamed these agencies in attempts to foil foreign interests The name changes were largely cosmetic and their foul work never changed Soviet leaders throughout the Cold War found it expedient to pit the KGB and the GRU against one another for maximum benefit of desired objectives Although the story herein is one of fiction perhaps it is more appropriately one of faction a fictional story derived from factual history and as we now know persists today Herein I have delved into many of the factual truths about these two Cold War secret spy organizations their sordid and brutal deeds their recruiting training and surveillance tactics agent operations and exploitation of Western technologies Enjoy

Returning Migrant Workers United Nations. Economic and Social Commission for Asia and the Pacific, 1986 The research reports and statements by government representatives contained in this volume were presented at the Policy Workshop on International Migration in Asia and the

Pacific held at Bangkok from 15-21 October 1985 The workshop was the final activity of a 2 year Economic and Social Commission for Asia and the Pacific ESCAP project on international migration policy in Asia and the Pacific funded by the UN Fund for Population Activities The 2nd phase of the project includes the studies reported in this volume which were intended to be exploratory They were meant to assess the current state of knowledge regarding return migration and to identify critical issues that would require further investigation 5 of the studies are concerned with return migration from temporary employment primarily in the Middle East Because many of the labor sending countries of the Mediterranean basin experienced a rapid expansion of labor emigration largely to northern and western Europe and a contraction of the flow and increase in return migration prior to current trends in Asian labor migration it was felt that a background paper on that experience would be value to policy makers in the ESCAP region Migration from the Pacific sub region of ESCAP is both of more variable duration and less heavily labor oriented than temporary migration from Asian countries to the Middle East The workshop s objectives were 1 to bring together researchers and policy makers to review carefully the results of the 7 studies carried out as part of the project 2 to relate the research findings to feasible government policies for the reintegration of returning labor migrants and 3 to make and disseminate policy recommendations to governments in the ESCAP region

*Film Review* ,2007-09      **How to Predict the Unpredictable** William Poundstone,2014-09-04 We are hard wired to believe that the world is more predictable than it is We chase winning streaks that are often just illusions and we are all too predictable exactly when we try hardest not to be In the 1970s Daniel Kahneman and Amos Tversky coined the phrase representativeness to describe the psychology of this behaviour Since then representativeness has been used by auditors to catch people fiddling their tax returns and by hedge fund managers to reap billions from the emotions of small investors Now Poundstone for the first time makes these techniques fun easy and profitable for everyone in the everyday situations that matter You ll learn how to tackle multiple choice tests what internet passwords to avoid how to up your odds of winning the office Premier League sweepstakes and the best ways to invest your money      **Academy Awards Oscar Annual** Robert A. Osborne,1974      **AI for You** Shalini Kapoor,Sameep Mehta,2022-12-05 Artificial Intelligence is all around us It is set to transform the way we run businesses Yet people fear it and businesses struggle to derive maximum value from it Learning from the best practices of industry leaders AI For You brings together frameworks and tools for infusing AI in business processes The book demystifies AI simplifies the complexities around AI technologies and describes how to take AI from lab to field while satisfying the concerns of different stakeholders A must read for builders consumers sponsors and sellers of AI AI For You lays down the building blocks for the AI revolution while attempting to close the gap between the promise of AI and its actual impact      *Return Migration and Remittances* William F.
