Washburn,Duane M. Rumbaugh,2007 Experts with a diverse range of perspectives explore the contributions made to the study of primate cognition and behavior and provide guideposts for new generations of researchers studying behavior as manifested across primate species The contributors first explore commonly used research methodology and then look at the groundbreaking content of recent research *Perspectives on Activity Theory* Yrjö Engeström,Reijo Miettinen,Raija-Leena Punamäki-Gitai,1999-01-13 Activity theory is an interdisciplinary approach to human sciences that originates in the cultural historical psychology school initiated by Vygotsky Leont ev and Luria It takes the object oriented artifact mediated collective activity system as its unit of analysis thus bridging the gulf between the individual subject and the societal structure This 1999 volume includes 26 chapters on activity theory by authors from ten countries In Part I of the book central theoretical issues are discussed from different points of view Some topics addressed in this part are epistemology methodology and the relationship between biological and cultural factors Part II is devoted to the acquisition

and development of language This part includes a chapter that analyzes writing activity in Japanese classrooms and a case study of literacy skills of a man with cerebral palsy Part III contains chapters on play learning and education and Part IV addresses the meaning of technology and the development of work activities The final part covers issues of therapy and addiction

Habituation Thomas J. Tighe, Robert N. Leaton, 2016-07-15 Originally published in 1976 this volume is based on a conference held in 1974 The purpose of the conference was to foster communication between those researchers studying habituation or closely related processes in children and those studying habituation at the level of neurophysiology and animal behaviour Within each of these groups there was burgeoning interest in habituation yet there had been little if any interaction between them Overall this volume provides a medium for cross fertilization between animal neurophysiological and developmental research on habituation highlighting some of the current empirical and theoretical concerns within each area at the time While other volumes may have provided more comprehensive and detailed reviews of aspects of habituation the juxtaposition of developmental and animal neuro physiological research provided in this text was unique in the literature at the time

Animal Behavior Lee Drickamer, 2001-07 Animal behaviour is a broad discipline with investigators and contributions from diverse perspectives including anthropology comparative psychology ecology physiology and zoology This book for a one semester introductory course uses evolutionary principles as a unifying theme to expose students to a number of approaches to the field of animal behaviour The authors also show that the varied perspectives used to study behaviour are complementary and often integrated rather than mutually exclusive The subtitle Mechanisms Ecology and Evolution reflects the book s theme

Personality in Nonhuman Animals Jennifer Vonk, Alexander Weiss, Stan A. Kuczaj, 2017-07-26 This stimulating and comprehensive collection brings together multiple perspectives on the topic of personality in nonhuman animals linking historical perspectives theoretical approaches methods and cutting edge discoveries Experts from various fields describe their findings on species ranging from dogs cats chimpanzees and dolphins to sharks snakes and other reptiles Chapters not only discuss the evolution of personality but also describe potential applications within the areas of animal human interactions animal ethics and welfare conservation science and other areas A key focus is the role of genetics and the environment in determining animal behavior and personality including related traits such as creativity and boredom These chapters present the study of personality in nonhumans as a means by which we can better understand medical and psychological issues specific to our own species as well Chapters include Exploring factor space and other adventures with the Hominoid Personality Questionnaire The quantitative and molecular genetics of individual differences in animal personality Personality temperament and individuality in reptile behavior What do we want to know about personality in marine mammals Individual differences in nonhuman animals examining boredom curiosity and creativity The interplay between animal personality and foraging ecology Taking significant steps in advancing the study of animal personality Personality in Nonhuman Animals will engage personality psychologists comparative psychologists and

behavior ecologists as well as conservationists zookeepers livestock managers and all those interested in the brain and behavior of animals *Geographic Variation in Behavior* Susan Adlai Foster, John A. Endler, 1999 Studies of animal behavior often assume that all members of a species exhibit the same behavior Geographic Variation in Behavior shows that on the contrary there is substantial variation within species across a wide range of taxa Including work from pioneers in the field this volume provides a balanced overview of research on behavioral characteristics that vary geographically The authors explore the mechanisms by which behavioral differences evolve and examine related methodological issues Taken together the work collected here demonstrates that genetically based geographic variation may be far more widespread than previously suspected The book also shows how variation in behavior can illuminate both behavioral evolution and general evolutionary patterns Unique among books on behavior in its emphasis on geographic variation this volume is a valuable new resource for students and researchers in animal behavior and evolutionary biology
