**Perspectives on Spatial Data Analysis** Luc Anselin, Sergio J. Rey, 2009-12-24 Spatial data analysis has seen explosive growth in recent years Both in mainstream statistics and econometrics as well as in many applied fields the attention to space location and interaction has become an important feature of scholarly work The methods developed to deal with problems of spatial pattern recognition spatial autocorrelation and spatial heterogeneity have seen greatly increased adoption in part due to the availability of user friendly desktop software Through his theoretical and applied work Arthur Getis has been a major contributing figure in this development In this volume we take both a retrospective and a prospective view of the field We use the occasion of the retirement and move to emeritus status of Arthur Getis to highlight the contributions of his work In addition we aim to place it into perspective in light of the current state of the art and future directions in spatial data analysis To this end we elected to combine reprints of selected classic contributions by Getis with chapters written by key spatial scientists These scholars were specifically invited to react to the earlier work by Getis with an eye toward assessing its impact tracing out the evolution of related research and to reflect on the future broadening of spatial analysis The organization of the book follows four main themes in Getis' contributions Spatial analysis Pattern analysis Local statistics Applications For each of these themes the chapters provide a historical perspective on early methodological developments and theoretical insights assessments of these contributions in light of the current state of the art as well as descriptions of new techniques and applications

**Sacred Darkness** Holley Moyes, 2012-09-01 Caves have been used in various ways across human society but despite the persistence within popular culture of the iconic caveman deep caves were never used primarily as habitation sites for early humans Rather in both ancient and contemporary contexts caves have served primarily as ritual spaces In Sacred Darkness contributors use archaeological evidence as well as ethnographic studies of modern ritual practices to envision the cave as place of spiritual and ideological power and a potent venue for

ritual practice Covering the ritual use of caves in Europe Asia Australia Africa Mesoamerica and the US Southwest and Eastern woodlands this book brings together case studies by prominent scholars whose research spans from the Paleolithic period to the present day These contributions demonstrate that cave sites are as fruitful as surface contexts in promoting the understanding of both ancient and modern religious beliefs and practices This state of the art survey of ritual cave use will be one of the most valuable resources for understanding the role of caves in studies of religion sacred landscape or cosmology and a must read for any archaeologist interested in caves
