and software aspects of the 8086 microprocessor. It offers the students an up to date account of the state of the art microprocessors and therefore can be regarded as an incomparable source of information on recently developed microprocessor chips. The book covers the advanced microprocessor architecture of the Intel microprocessor family from 8086 to Pentium 4. The text is organized in four parts. Part I Chapters 1-7 includes a detailed description of the architecture organization instruction set and assembler directives of microprocessor 8086. Part II Chapters 8-11 discusses the math coprocessor multiprocessing and multiprogramming the different types of data transfer schemes and memory concepts. Part III Chapters 12-15 covers programmable interfacing chips with the help of extensive interfacing examples. Part IV Chapters 16-18 deals with advanced processors from 80186 to Pentium 4. This well organized and student friendly text should prove to be an invaluable asset to the students as well as the practising engineers.

KEY FEATURES Gives elaborate programming examples to develop the analytical ability of students. Provides solved examples covering different types of typical interfacing problems to develop the practical skills of students. Furnishes chapter end exercises to reinforce the understanding of the subject.

The 8086/8088 Family John E. Uffenbeck, 1987. This book presents the full range of Intel 80x86 microprocessors in context as a component of a comprehensive microprocessor system. It provides a thorough single volume coverage of all Intel processors relative to their application in the PC and is as much an introduction to the PC itself as to Intel chips. Covers all PC related technologies including memory data communications and PC bus standards. The second edition of The 8086/8088 Family Design Programming and Interfacing has been revised to include the latest most up to date information and technologies. This edition now covers Windows a description of the MS DOS BIOS services and function calls two completely revised software chapters an updated chapter on memory coverage of the 16550 UART and common modern standards and a new chapter on PC architecture and the common bus systems.
