It covers Understanding Windows Programming Basics, Creating Windows Forms Applications, Creating Windows Services Applications, Accessing Data in a Windows Forms Application, Deploying a Windows Application. Both exams share many common elements so it would be wise to study for both together. For the exams, programming language is not the core issue. It is the concept behind the development effort that is important. You need to know that it is technically possible to use any .NET language to write programs but C# and VB are more popular. We use C# code for demonstration in this book. You do need to know how to use Visual Studio. Officially, it is Visual Studio 2008. However, for learning purpose, it would not hurt for you to use Visual Studio 2010 or 2012.
