Duddy, 2018-02-09

Excerpt from *A New Way to Solve Old Problems*: Those who attempt to put psychology and pedagogy into actual school practice face an appalling task. It demands hours and hours of prayer, weeks and weeks of study, and years and years of experimentation. When this psychology and pedagogy are religious, the task is more than appalling; it is overwhelming. An aim in theory is one thing; to translate it into terms of child consciousness is quite another. Content on paper is a wholly different matter from content in the form of ideas and feelings; the method stated in the form of principles is a total stranger to the same rules or laws as expressed in the form of spiritual reactions. Any thoughtful person who has read a hundred of the best books on religious education may have an illuminating and shocking experience by visiting or teaching week after week in any average Sunday school with his critical attention and judgment at their best. This is the precise experience that a rational reformer of the Sunday school must have at least in the beginning of his endeavors. This chapter attempts to sketch such an experience. Drive lasting change with a new nimbler organization focused on continuous change. Our organizations are stuck. We talk about agility but find ourselves bogged down in bureaucracy. We aspire to innovate but run into systems built to prevent mistakes, not spark breakthroughs. We need to learn and adapt but we're operating with an outdated

playbook built for efficiency and control And our attempts to fix all this by pouring trillions into huge top down transformations make the problems worse But there is a better way Building an Octopus Organization One of nature s most intelligent and curious creatures the octopus is everything your organization needs to be smart endlessly adaptable and highly resilient Its eight tentacles work in concert but each can also think for itself This book shows how to achieve the same balance of cohesion and autonomy and to guide your organization toward a living breathing system one that learns adapts and thrives by tapping into the distributed intelligence of its people Drawing on their experience at companies such as Amazon and McDonald s and work with hundreds of global companies AWS executives Phil Le Brun and Jana Werner show you how to break away from the broken model of transformation and embrace continuous change They share thirty six antipatterns conditioned habits that keep us stuck and in their place provide levers that create meaningful improvement in months not years The Octopus Organization is your guide to moving beyond rigid structures and nurturing the living adaptable organization you aspire to create and be a part of
