Human Interaction, Emerging Technologies and Future Applications II Tareq Ahram, Redha Taiar, Vincent Gremeaux-Bader, Kamiar Aminian, 2020-04-02 This book reports on research and developments in human technology interaction. A special emphasis is given to human computer interaction and its implementation for a wide range of purposes such as healthcare, aerospace, telecommunication and education among others. The human aspects are analyzed in detail. Timely studies on human centered design, wearable technologies, social and affective computing, augmented virtual and mixed reality, simulation, human rehabilitation and biomechanics represent the core of the book. Emerging technology applications in business, security and infrastructure are also critically examined, thus offering a timely, scientifically grounded but also professionally oriented snapshot of the current state of the field. The book is based on contributions presented at the 2nd International Conference on Human Interaction and Emerging Technologies Future Applications (IHIET AI 2020) held on April 23-25 in Lausanne, Switzerland. It offers a timely survey and a practice-oriented reference guide to researchers and professionals dealing with design and/or management of the new generation of service systems.

An Introduction to Data Analysis in R Alfonso Zamora Saiz, Carlos Quesada González, Lluís Hurtado Gil, Diego Mondéjar Ruiz, 2020-07-27 This textbook offers an easy-to-follow practical guide to modern data analysis using the programming language R. The chapters cover topics such as the fundamentals of programming in R, data collection and preprocessing, including web scraping, data visualization and statistical methods, including multivariate analysis and feature exercises at the end of each section. The text requires only basic statistics skills as it strikes a balance between statistical and mathematical understanding and implementation in R, with a special emphasis on reproducible examples and real-world applications. This textbook is primarily intended for undergraduate students of mathematics, statistics, physics, economics, finance and business who are pursuing a career in data analytics. It will be equally valuable for master students of data science and industry professionals who want to conduct data analyses.
