Make: Technology on Your Time Volume 30 Mark Frauenfelder,2012-04-18 The first magazine devoted entirely to do it yourself technology projects presents its 30th quarterly edition for people who like to tweak disassemble recreate and invent cool new uses for technology Until recently home automation was an unfulfilled promise systems were gimmicky finicky user hostile or potentially unsecure But today thanks to a new crop of devices and technologies home automation is useful fun and maker friendly Using smartphones wireless networks the internet simple microcontrollers and even gesture recognition DIY style Smart Homes can now do everything promised and more for much less and MAKE shows you how in Volume 30 HEALTHCARE SOLUTIONS USING MACHINE LEARNING Dr. Sushil Dohare,Ismail Keshta,Mr. Ashish Kumbhare,Piyush Kumar Thakur,2023-04-24 The Turing Test is an experiment that examines whether or not the behaviours of a machine are indistinguishable from those of a human being The test was named after Alan Turing It was intended as a test to determine whether or not a computer have the ability to demonstrate artificial intelligence It is

inaccurate and there should be a clear distinction between the two terms In point of fact artificial intelligence comprises a variety of learning processes and is not limited to only machine learning alone Rather it is about learning in general Components of artificial intelligence include things like natural language processing deep learning and representation learning NLP The process of digitalizing which is also known as datafication each and every aspect of life in the present day is referred to as datafication The generation of these new data sets paves the way for the transformation of previously collected information into innovative and possibly lucrative forms Samuel s software was executed on an IBM 701 computer which was about the same size as a standard double bed The majority of the time the data was in discrete form This is not a reference to the process of really gaining information rather it is a reference to the job that is now being carried out During this stage a prototype is built by evaluating multiple models in light of historical data to determine which model will be the most successful Adjusting the model s hyperparameters is a necessary step that will be discussed in further depth in the following section of this chapter The ideas that determine what constitutes appropriate and inappropriate behaviour are collectively referred to as morality The subsequent secondary components that need to be looked at are the cost effectiveness the quality of the patient experience and the overall quality of the healthcare provided The overall number of patients that a provider treats and the total cost of care that patient receives from that provider both go into the financial rewards that the provider receives The case studies that are presented here provide insightful and thought provoking insights on the application of artificial intelligence machine learning and big data in the field of medicine [Digital Exhaust](#) Dale Neef,2014-11-05 Will Big Data supercharge the economy tyrannize us or both Data Exhaust is the definitive primer for everyone who wants to understand all the implications of Big Data digitally driven innovation and the accelerating Internet Economy Renowned digital expert Dale Neef clearly explains What Big Data really is and what s new and different about it How Big Data works and what you need to know about Big Data technologies Where the data is coming from how Big Data integrates sources ranging from social media to machine sensors smartphones to financial transactions How companies use Big Data analytics to gain a more nuanced accurate picture of their customers their own performance and the newest trends How governments and individual citizens can also benefit from Big Data How to overcome obstacles to success with Big Data including poor data that can magnify human error A realistic assessment of Big Data threats to employment and personal privacy now and in the future Neef places the Big Data phenomenon where it belongs in the context of the broader global shift to the Internet economy with all that implies By doing so he helps businesses plan Big Data strategy more effectively and helps citizens and policymakers identify sensible policies for preventing its misuse By conservative estimate the global Big Data market will soar past 50 billion by 2018 But those direct expenses represent just the tip of the iceberg when it comes to Big Data s impact Big Data is now of acute strategic interest for every organization that aims to succeed and it is equally important to everyone else Whoever you are Data Exhaust tells you exactly what you need to know about Big Data
