*Introducing iOS 8* Steve Derico, 2014-12-03 Learn to make iOS apps even if you have absolutely no programming experience. This hands on book takes you from idea to App Store using real world examples such as driving a car or eating at a restaurant to teach programming and app development. You'll learn concepts through clear, concise, jargon free language. This book focuses on Apple's new programming language Swift. Each lesson is divided into two parts: the lecture portion explains the terms and concepts through examples, and the exercise portion helps you apply these concepts while building real world apps like a tip calculator. Learn how to think differently and see the world from a whole new perspective. Learn the basic building blocks of programming. Dive into the Swift programming language. Make apps for iPhone and iPad. Use GPS in your app to find a user's location. Take or select photos with your app. Integrate your app with Facebook and Twitter. Submit your app to the App Store. Manage and market your app on the App Store.
