Challenging the United States Symmetrically and Asymmetrically Lloyd J. Matthews, 1998 The U S Army War College s Ninth Annual Strategy Conference was held at Carlisle Barracks Pennsylvania during the period March 31 April 2 1998 The theme of the conference was Challenging the United States Symmetrically and Asymmetrically Can America Be Defeated There were some 150 attendees including active duty military personnel as well as members of academe the U S Defense and service departments think tanks corporations and news media This book is an outgrowth of that conference though it makes no effort to present a comprehensive and literal record of events in the mold of traditional colloquium proceedings Rather the book is organized as an anthology of selected conference presentations complemented by sufficient notice of roundtable and question and answer discussion to provide a glimpse of the vigorous interplay of ideas evoked by this most timely of topics *Challenging the United States Symmetrically and Asymmetrically: Can America Be Defeated?*

Lloyd J. Matthews, **Death as Entertainment** Gareth R. Schott, 2023-06-06 This book explores the moral and representational issues associated with engaging young people with popular media depictions of death and dying Emotionally charged depictions of death play an important role in contemporary media directed toward teen and young adult audiences Across creative works as diverse as interactive digital games graphic novels short form serial narratives television and films young people gain opportunities to engage with representations of death In some cases representations of death dying and the decision to end one s own life have been subject to public outcry and criticism related to its perceived potential impact on impressionable audiences Death in as entertainment can also be fleeting commonplace and used for humour making it trivial The chapters in this volume particularly consider the types of engagement made possible through different contemporary creative mediums and the ways in which they might distinctively capture or arouse thoughts and feelings on the end and loss of a human life Death as Entertainment will appeal to researchers and students interested in new media and its cultural and psychological impact The chapters in this book were originally published as a special issue of *Mortality*

Little, Alison Winch, 2021-06-23 This book offers an original critique of the billionaire founders of US West Coast tech
companies addressing their collective power influence and ideology their group dynamics and the role they play in the wider
sociocultural and political formations of digital capitalism Interrogating not only the founders political and economic
ambitions but also how their corporations are omnipresent in our everyday lives the authors provide robust evidence that a
specific kind of patriarchal power has emerged as digital capitalism s mode of command The New Patriarchs examined over
the course of the book include Sergey Brin and Larry Page of Google Elon Musk of Tesla Jeff Bezos of Amazon Mark
Zuckerberg of Facebook and Peter Thiel We also include Sheryl Sandberg The book analyses how these mostly men
legitimate their rapidly acquired power tying a novel kind of socially awkward but visionary masculinity to exotic forms of
shareholding Drawing on a ten million word digital concordance the authors intervene in feminist debates on patriarchy
masculinity and postfeminism locating the power of the founders as emanating from a specifically racialised structure of
oppression tied to imaginaries of the American frontier the patriarchal household and settler colonialism This is an important
interdisciplinary contribution suitable for researchers and students across Digital Media Media and Communication and
Gender and Cultural Studies *The Skeptic Encyclopedia of Pseudoscience* Michael Shermer, 2002-11-14 A thorough

objective and balanced analysis of the most prominent controversies made in the name of science from the effectiveness of
proposed medical treatments to the reality of supernatural claims Annotation For decades the Skeptics Society has been
examining supernatural and extrascientific claims and publishing their findings in Skeptic magazine This two volume set
contains a number of articles from that publication along with new material In volume one 59 alphabetical entries introduce
the reader to scientific research on phenomena such as crop circles astrology the Shroud of Turin and witchcraft Twenty
three articles examine more closely such topics as homeopathy the origins of the pyramids and the search for Atlantis Case
studies debates and a selection of historical documents are found in volume two *The Virginia Quarterly Review* , 2017

Challenges to the Enlightenment Academy of Humanism, 1994-02 Modern western society with its democratic
institutions and its reliance on science as the basis of technology and industry is largely an outgrowth of Enlightenment
ideals Yet today the entire Enlightenment agenda is being challenged not only by members of the religious orthodoxy but also

by a group of academics loosely described under the label of postmodernism Whereas the Enlightenment project has always been at odds with religious orthodoxy which has traditionally been suspicious of efforts to achieve human progress without supernatural support today it must deal with a very different type of attack from postmodernist intellectuals **Actes** ,1998
 Helios ,1995 *Genes Vs. Memes* Walter A. Koch,1986 **Waves of Change** Patrick Callioni,2010 Written in the middle of a global economic crisis this book is about a better future Patrick Callioni identifies and describes the major waves of change that are coming our way over the next decade or so and then provides practical advice on what to do or avoid doing to benefit most or suffer least from what is to come He describes some of the problems with the present regime of regulation We are regulating to catch the motes of dust floating in the air rather than the beams that end up poking out the eyes of our financial markets and suggests regulation should focus on rewarding the good rather than punishing the bad He also analyzes some of the behavior that helped to create the Credit Crunch They took healthy debt mortgage debt that was likely to be repaid mixed it up with toxic debt mortgage debt not likely to be repaid and then sold the debt on as prime safe debt creating untold damage Then he presents the waves of change that are coming the challenges of new technologies the business opportunities opened by reactions to climate change and demographic changes as workers and managers are no longer predominantly baby boomers He also warns of future signs of impending financial setbacks that should be avoided A financial crisis will occur only when the fuel is there in the form of an investment bubble In his previous book *Compliance and Regulation in the Financial Services Industry* Patrick Callioni successfully predicted most of the course of the current economic downturn Over regulation is as dangerous as under regulation so he proposes the creation of a federated network of trust Throughout this exciting book he emphasizes the increasing importance of knowledge capital value that is not captured by existing accounting standards and in particular soft intangibles knowledge assets time assets motivational assets etc and he proposes guidance on their measurement and profitable management **Creation Research Society Quarterly** Creation Research Society,2002 My Kind of Angel William S. Burroughs,1998 A collection of interviews with William Burroughs and various critical writings on his work Also included are poetry and prose pieces written by various authors in tribute to the late writer *The Future of Atheism* Alister E.
