

**NEW SCIENCE = NEW ARCHITECTURE?**

# New Science New Architecture

**Andrea Gleiniger, Georg Vrachliotis**

## **New Science New Architecture:**

**Architectural Theory, Volume 2** Harry Francis Mallgrave, Christina Contandriopoulos, 2008-08-11 This second volume of the landmark Architectural Theory anthology surveys the development of architectural theory from the Franco Prussian war of 1871 until the end of the twentieth century The entire two volume anthology follows the full range of architectural literature from classical times to present transformations An ambitious anthology bringing together over 300 classic and contemporary essays that survey the key developments and trends in architecture Spans the period from 1871 to 2005 from John Ruskin and the arts and crafts movement in Great Britain through to the development of Lingang New City and the creation of a metropolis in the East China sea Organized thematically featuring general and section introductions and headnotes to each essay written by a renowned expert on architectural theory Places the work of architects like Koolhaas Eisenman and Lynn alongside the work of prominent architectural critics offering a balanced perspective on current debates Includes many hard to find texts and works never previously translated into English Alongside Volume I An Anthology from Vitruvius to 1870 creates a stunning overview of architectural theory from early antiquity to the twenty first century

*Nexus Network Journal 14,1* Kim Williams, 2014-05-15 The Winter 2012 vol 14 no 1 issue of the Nexus Network Journal is dedicated to the theme Architecture Systems Research and Computational Sciences This is an outgrowth of the session by the same name which took place during the eighth international interdisciplinary conference Nexus 2010 Relationships between Architecture and Mathematics held in Porto Portugal in June 2010 Today computer science is an integral part of even strictly historical investigations such as those concerning the construction of vaults where the computer is used to survey the existing building analyse the data and draw the ideal solution What the papers in this issue make especially evident is that information technology has had an impact at a much deeper level as well architecture itself can now be considered as a manifestation of information and as a complex system The issue is completed with other research papers conference reports and book reviews Complexity Andrea Gleiniger, Georg Vrachliotis, 2012-11-05 Digitalization has transformed the discourse of architecture that discourse is now defined by a wealth of new terms and concepts that previously either had no meaning or had different meanings in the context of architectural theory and design Its concepts and strategies are increasingly shaped by influences emerging at the intersection with scientific and cultural notions from modern information technology The series Context Architecture seeks to take a critical selection of concepts that play a vital role in the current discourse and put them up for discussion When Vitruvius described the architect as a *uomo universale* he gave rise to the architect's conception of him or herself as a generalist who shapes a complex reality The architectural concept of complexity however failed to keep pace with industrial and social reality becoming instead an increasingly formal and superficial notion that could ultimately be applied to almost anything Against it architectural modernism set the watchword of simplification less is more In this situation Robert Venturi reintroduced the notion of complexity into

architectural discourse his goal was not just to restore the complexity of architectonic forms and their history but also to explore the concrete reality of the existing built environment Today it is complexity studies with their starting point in physics that define the current approach to the concept of complexity They have established a new connection between the natural sciences and information technology and have thus become a central premise of computer based approaches to design

Putting Tradition into Practice: Heritage, Place and Design Giuseppe Amoroso, 2017-07-19 This book gathers more than 150 peer reviewed papers presented at the 5th INTBAU International Annual Event held in Milan Italy in July 2017 The book represents an invaluable and up to date international exchange of research case studies and best practice to confront the challenges of designing places building cultural landscapes and enabling the development of communities The papers investigate methodologies of representation communication and valorization of historic urban landscapes and cultural heritage monitoring conservation management cultural issues in heritage assessment placemaking and local identity enhancement as well as reconstruction of settlements affected by disasters With contributions from leading experts including university researchers professionals and policy makers the book addresses all who seek to understand and address the challenges faced in the protection and enhancement of the heritage that has been created

Integrated Buildings Leonard R. Bachman, 2002-12-23 An anatomical study of building systems integration with guidelines for practical applications Through a systems approach to buildings Integrated Buildings The Systems Basis of Architecture details the practice of integration to bridge the gap between the design intentions and technical demands of building projects Analytic methods are introduced that illustrate the value benefit and application of systems integration as well as guidelines for selecting technical systems in the conceptual schematic and design development stages of projects Landmark structures such as Eero Saarinen s John Deere Headquarters Renzo Piano s Kansai International Airport Glenn Murcutt s Magney House and Richard Rogers s Lloyd s of London headquarters are presented as part of an extensive collection of case studies organized into seven categories Laboratories Offices Pavilions Green Architecture High Tech Architecture Airport Terminals Residential Architecture Advanced material is provided on methods of integration including an overview of integration topics the systems basis of architecture and the integration potential of various building systems An expanded case study of Ibsen Nelsen s design for the Pacific Museum of Flight is used to demonstrate case study methods for tracing integration through any work of architecture Visually enhanced with more than 300 illustrations diagrams and photographs Integrated Buildings The Systems Basis of Architecture is a valuable reference guide for architecture and civil engineering students as well as architects engineers and other professionals in the construction industry

**Material Architecture** John Fernandez, 2006 Composed of a series of essays this book deals with the broad issues affecting the nature of architectural materials and provides a focused review of the state of the art materials It also provides designers with the tools they need to evaluate and select from the thousands of different materials that are available to them The book is organized into three sections Time

looks at how the materials used in architectural design have changed over the years showing how we have come to use the materials we do in contemporary design Materials covers all five material families metals polymers ceramics composites and natural materials giving in depth information on their properties behavior origins and uses in design It also introduces a review of the cutting edge research for each family Systems outlines the technical design orientated research that uncovers how new architectural assemblies can be designed and engineered All of this practical advice is given along with many real case examples illustrating how this knowledge and information has been and can be used in architectural design

**Changing Ideals in Modern Architecture, 1750-1950** Peter Collins,1998 Changing Ideals in Modern Architecture revolutionized the understanding of modernism in architecture pushing back the sense of its origin from the early twentieth century to the 1750s and thus placing architectural thought within the a broader context of The American Architect and Building News ,1890

**New Architecture Of Science, The: Learning From Graphene** Kostya S Novoselov,Albena Yaneva,2020-06-26 The New Architecture of Science explores how the architecture of advanced nanoscience labs affects the way scientists think conduct experiments interact and collaborate The unique design of the National Graphene Institute in Manchester UK sheds light on the new generation of 21st century science laboratories Weaving together two tales of this building lead scientist and one of the designers Kostya Novoselov and architectural anthropologist Albena Yaneva combine an analysis of its distinctive design features with ethnographic observation of the practices of scientists facility managers technicians administrators and house service staff Capturing simultaneously the complex technical infrastructure and the variability of human experiences that it facilitates contemporary laboratory buildings are shown to be vital settings for the active shaping of new research habits and ways of thinking ultimately leading to discovery and socio technical innovations Related Link s
