Important additional information includes the five appendices I Generic Names The Generic Name Appendix indicates the chemical function of the compound. If the compound has more than one function all functions are indicated. In this case the synthesis route of the compound is found under the first function indicated in this Appendix II Trade Names. When only the trade name of the product is known the corresponding generic name is found in this Appendix III Raw Materials and Intermediates. This Appendix lists all pesticides the synthesis of which uses a given raw material or intermediate IV Synthesis of Raw Materials and Intermediates. The synthesis routes of Raw Materials and Intermediates are presented in this Appendix V Chemical Functions. This Appendix lists all products which have the same chemical function. The synthesis routes for each product are described under the heading of the main function. When a product has more than one main chemical function it is listed under all its functions.
