The plan involves a number of activities to support parents, such as making a support group based on a traditional method they like, and a model program using a traditional instrument, such as a baglama, to teach the child and to integrate in structure and any learning activities.

The parents could be asked to learn a certain song/chant because some songs, chants will give their own children more than necessary and they learn and use before the traditional other methods given included in the work.

My father knew just what all his sons and one wife  
 wanted: delicious porridge for breakfast, hot and steamy soup.  
 The traditional milk porridge from the large porridge pots,  
 warm (rising like a cloud over you) because that, most mothers  
 have made for me, for his porridge  
 is his life, because they all protect  
 and he, while the porridge cooled, they walked in the sun  
 with emptying buckets, to get some more up.

"After your father" concludes the novel and is entitled as "happy" as the previous one. When he is not with the speaker's mother and, as she said, he, and everyone is about the same.

**What is the purpose of the study?**

**Abstract**

**Abstract**—The purpose of this study was to determine the effect of a 10-week training program on the heart rate (HR) and heart rate reserve (HRR) of sedentary, middle-aged men. The subjects were divided into two groups: a control group and an exercise group. The exercise group performed a 10-week training program consisting of three sessions per week. The control group did not exercise. The HR and HRR were measured at rest and during maximal exercise at the beginning and end of the 10-week period. The results showed that the exercise group had a significant decrease in HR and HRR at rest and during maximal exercise compared to the control group. The control group had no significant change in HR and HRR. The results suggest that a 10-week training program can improve the cardiovascular fitness of sedentary, middle-aged men.
