*Legal Literacy* Archie Zariski, 2014-10-01 To understand how the legal system works students must consider the law in terms of its structures processes language and modes of thought and argument in short they must become literate in the field *Legal Literacy* fulfills this aim by providing a foundational understanding of key concepts such as legal personhood jurisdiction and precedent and by introducing students to legal research and writing skills Examples of cases statutes and other legal materials support these concepts While *Legal Literacy* is an introductory text it also challenges students to consider critically the system they are studying Touching on significant socio legal issues such as access to justice legal jargon and plain language Zariski critiques common legal traditions and practices and analyzes what it means to think like a lawyer As such the text provides a sound basis for those who wish to pursue further studies in law or legal studies as well as those seeking a better understanding of how the legal field relates to the society that it serves

**Mind, Body, World** Michael R. W. Dawson, 2013 Cognitive science arose in the 1950s when it became apparent that a number of disciplines including psychology computer science linguistics and philosophy were fragmenting Perhaps owing to the field's immediate origins in cybernetics as well as to the foundational assumption that cognition is information processing cognitive science initially seemed more unified than psychology However as a result of differing interpretations of the foundational assumption and dramatically divergent views of the meaning of the term information processing three separate schools

emerged classical cognitive science connectionist cognitive science and embodied cognitive science Examples cases and research findings taken from the wide range of phenomena studied by cognitive scientists effectively explain and explore the relationship among the three perspectives Intended to introduce both graduate and senior undergraduate students to the foundations of cognitive science Mind Body World addresses a number of questions currently being asked by those practicing in the field What are the core assumptions of the three different schools What are the relationships between these different sets of core assumptions Is there only one cognitive science or are there many different cognitive sciences Giving the schools equal treatment and displaying a broad and deep understanding of the field Dawson highlights the fundamental tensions and lines of fragmentation that exist among the schools and provides a refreshing and unifying framework for students of cognitive science

**Interrogating Motherhood** Lynda R. Ross, 2016-12-30 It has been four decades since the publication of Adrienne Rich's *Of Woman Born* but her analysis of maternity and the archetypal Mother remains a powerful critique as relevant today as it was at the time of writing It was Rich who first defined the term motherhood as referent to a patriarchal institution that was male defined male controlled and oppressive to women To empower women Rich proposed the use of the word mothering a word intended to be female defined It is between these two ideas that of a patriarchal history and a feminist future that the introductory text *Interrogating Motherhood* begins Ross explores the topic of mothering from the perspective of Western society and encourages students and readers to identify and critique the historical social and political contexts in which mothers are understood By examining popular culture employment public policy poverty other mothers and mental health *Interrogating Motherhood* describes the fluid and shifting nature of the practice of mothering and the complex realities that define contemporary women's lives
