## Opmerkingen Over De Chaos:

**The Present Chaos in Monetary Standards and how to Deal with it** Irving Fisher, 1921      The Rise of the Dutch New Right Merijn Oudenampsen, 2020-09-13 In the past 20 years a wave of right wing populist movements has swept over Europe changing the face of European politics The Netherlands has been one of the more iconic countries to partake in this shift Known internationally as an emblem of progressivism and tolerance the country soon became a frontrunner in the revival of nationalist and anti immigrant sentiment This is the first study to offer an extensive engagement with the ideas behind the Dutch swing to the right The emergence of Dutch populism this book shows formed an integral part of a broader conservative tendency identified as the Dutch New Right In the US and the UK the term New Right has been used to describe conservative backlash movements that arose in opposition to the progressive movements of the 1960s The Dutch swing to the right this book argues formed a belated iteration of the New Right backlash that occurred overseas This text will be essential reading for students and scholars in the fields of European Studies and Political Science and Dutch politics and society more specifically      Intercultural Encounters Wim M. J. van Binsbergen, 2003 This book brings together fifteen essays investigating aspects of interculturality Like its author it operates at the borderline between social anthropology and intercultural philosophy It seeks to make a contribution to intercultural philosophy by formulating with great precision and painful honesty the lessons deriving from extensive intercultural experiences as an anthropologist Its culminating section presents an intercultural philosophy revolving on the tenet cultures do not exist The kaleidoscopic nature of intercultural experiences is reflected in the diversity of these texts Many belong to a field that could be described as meta anthropology others are more clearly philosophical occasionally they spill over into belles lettres ancient history and comparative cultural and religious studies The ethnographic specifics supporting the arguments are diverse deriving from various African situations in which the author has conducted participatory field research Tunisia Zambia Botswana and South Africa      **Van Hugo Claus tot hoelahoep** Kevin Absillis, Katrien Jacobs, 2007 Historische artikelen over de cultuur in Vlaanderen in de jaren vijftig      **National Union Catalog**, 1980 Includes entries for maps and atlases      The National Union Catalogs, 1963-, 1964      **Het idee van de functionele stad** Cornelis van Eesteren, 1997 To many people the idea of the functional city lost its former appeal after the seventies There were good reasons for that but the functional city is not something that will go away To contemporary eyes historic cities possess an enchanting and innocent beauty but once they were fully functioning centres of craft and trade Habitation work and traffic are still the dominant factors in the structure of a city The modern city is marked however by an unprecedented enlargement of scale The idea of the functional city stems from the problems associated with this phenomenon C van Eesteren was no utopian nor was he an architectural messiah His lecture on the idea of the functional city in January 1928 was a down to earth appraisal of new design tasks that had so far been completely ignored Now that the idea of the functional city is on the agenda again it is interesting to examine why the

pioneers of functionalism broke with the historicizing practices of their predecessors Perhaps the choice they made was too radical This book reconstructs the historic moment of that choice Bookjacket **Monographic Series** Library of Congress,
