Optimization in Chemical Engineering Fernando Israel Gómez-Castro,Vicente Rico-Ramírez,2025-04-21 Optimization is an area in constant evolution The search for robust optimization techniques to deal with the highly non convex models that represent the systems related to Chemical Engineering has led to important advances in the area The need for developing economically feasible processes which are simultaneously environmentally friendly safe and controllable requires for adequate optimization strategies Moreover finding a global optimum is still a challenge for a diversity of cases Thus this book presents a compilation of classic and emerging optimization techniques focusing on their application to systems related to the Chemical Engineering The book shows the applications of classic mathematical programming metaheuristic optimization methods and machine learning based strategies The analysis of the described techniques allows the reader identifying the advantages and disadvantages of each approach Moreover the book will discuss the perspectives for future developments on the area

Optimization of Chemical Processes Thomas F. Edgar,David Mautner Himmelblau,1988 *AI and Robotic Technology in Materials and Chemistry Research* Xi Zhu,2024-11-06 A singular resource for researchers seeking to apply artificial intelligence and robotics to materials science In *AI and Robotic Technology in Materials and Chemistry Research* distinguished researcher Dr Xi Zhu delivers an incisive and practical guide to the use of artificial intelligence and robotics in materials science and chemistry Dr Zhu explains the principles of AI from the perspective of a scientific researcher including the challenges of applying the technology to chemical and biomaterials design He offers concise interviews and surveys of highly regarded industry professionals and highlights the interdisciplinary and broad applicability of widely available AI tools like ChatGPT The book covers computational methods and approaches from algorithms models and experimental data systems and includes case studies that showcase the real world applications of artificial intelligence and lab automation in a variety of scientific research settings from around the world You ll also find A thorough introduction to the challenges currently being faced by chemists and materials science researchers Comprehensive explorations of autonomous laboratories powered by artificial intelligence and robotics Practical discussions of a blockchain powered anti counterfeiting experimental data system in an autonomous laboratory In depth treatments of large language models as applied to autonomous materials research Perfect for materials scientists analytical chemists and robotics engineers *AI and Robotic Technology in Materials and Chemistry Research* will also benefit analytical and pharmaceutical chemists computer analysts and other professionals and researchers with an interest in artificial intelligence and robotics
