offering enlightenment it s describing it The enlightened mind unites intellect and emotion despite their separation being  
built into the structure of our brains This split appears in the mythic division between our lower and higher natures and the  
separation of mind and body Intellect and emotion function in concert As color and shape are to vision one complements the  
other When fully integrated they cannot be taken apart The topics in the book s first half lean toward the intellectual The  
second half looks at the division from the emotional side What we are separating with one hand we are putting together with  
the other Struggle We naturally consider our problems as different from ourselves We see them in our environment and rely  
on our skills and insights to resolve them Our intellectual solutions address one aspect of these problems while our emotions  
address another Are these problems to be solved or processes to be understood What should we do if our problems are inside  
us Mind Your state determines your readiness arousal and self reflection Your state of mind orients your thinking how you  
can feel about yourself and who you re able to be Equally important are thoughts you re not likely to have or cannot have at  
all This book is about the states of mind that support focus awareness thoughts and feelings It s is not a guide to solving  
problems it s an explanation of how you see State With our state of mind we gather our thoughts and focus our attention  
Focus without a state is like a telescope with no one to look through it In order to focus first take full responsibility for all you  
think and feel The properties of your state determine what you re capable of One state of mind is not enough because you  
cannot understand the world from one point of view Your future is determined by your range of states of mind Wisdom  
Alternate states of mind support understandings we don t have They may be logical emotional spiritual or evanescent They  
could involve knowledge spread across generations so that no one generation has the complete picture We might call them  
prophetic inspired psychedelic or delusional Larger states of mind develop with experience but they re not defined by the  
facts they hold One needs a state of mind that can accommodate contradictions without generating conflict Instantaneous  
Enlightenment Change does not happen instantly but epiphanies feel instantaneous The reason is simple a new state is a  
whole rearrangement of one s previous conception There are no halfway states to total rearrangement Many pieces need to  
fall into place before we can make ourselves into something new We are at a watershed moment in our understanding of the  
mind after which psychology will change Instead of focusing on thoughts and behavior we are coming to understand that
