and Institutional Infrastructure Program and Project Requirements NPR 7120 8 NASA Research and Technology Program and Project Management Requirements and NPD 1000 5 Policy for NASA Acquisition The second function is to describe the schedule management approach and the recommended best practices for carrying out this project control function With regards to the above project management requirements documents it should be noted that those space flight projects previously established and approved under the guidance of prior versions of NPR 7120 5 will continue to comply with those requirements until project completion has been achieved NASA SP. ,1973 Enterprise Risk and Opportunity Management Allan S. Benjamin,2017-01-03 Risk management strategy for the pioneering technological sector Enterprise Risk and Opportunity Management provides much needed guidance tailored specifically to the technological sector While most enterprise risk management guides are written for traditional businesses and finance firms this book translates effective enterprise risk and opportunity management EROM principles into strategies and practices that work for government nonprofit and for profit organizations in the technological space Originally designed for noncommercial pioneering enterprises like NASA an entire chapter is now devoted toward applying the methods to profit making technological enterprises A 40 year veteran of the tech sector Dr Allan Benjamin outlines risk management strategies for organizations in which the advancement and integration of science and technology within complex systems is necessary for accomplishment of the mission Commercial EROM strategies do not translate directly when the development and implementation of risky technologies is the organization s primary objective and clumsy or near sighted implementation can easily cripple progress This book provides authoritative guidance tailored to the sector s specialized needs Maximize opportunity while effectively managing risk Understand the core principles of the technological EROM approach and its interfaces with the management of the organization Comprehend the intricacies of aggregating risks and opportunities from lower to higher levels of the organization Gain expert insights specific to the technology sector Mitigate and control the risk that comes with pursuing discovery In practice EROM in this sector involves working with mostly qualitative data and is characterized by high uncertainty Managing risk without handicapping the organization requires a specific set of adjustments to traditional EROM and a more nuanced approach to the idea of acceptable risk Balance is key in technological EROM and Enterprise Risk and Opportunity Management provides foundational guidance real world strategy and enlightening examples for getting it right *Nasa Schedule Management Handbook* Marc Gibbons,Nasa Technical Reports Server (Ntrs),Et Al,2013-06 The purpose of schedule management is to provide the framework for time phasing resource planning coordination and communicating the necessary tasks within a work effort The intent is to improve schedule management by providing recommended concepts processes and techniques used within the Agency and private industry The intended function of this handbook is two fold first to provide guidance for meeting the scheduling requirements contained in NPR 7120 5 NASA Space Flight Program and Project Management Requirements NPR 7120 7 NASA Information Technology

and Institutional Infrastructure Program and Project Requirements NPR 7120 8 NASA Research and Technology Program and Project Management Requirements and NPD 1000 5 Policy for NASA Acquisition The second function is to describe the schedule management approach and the recommended best practices for carrying out this project control function With regards to the above project management requirements documents it should be noted that those space flight projects previously established and approved under the guidance of prior versions of NPR 7120 5 will continue to comply with those requirements until project completion has been achieved This handbook will be updated as needed to enhance efficient and effective schedule management across the Agency It is acknowledged that most if not all external organizations participating in NASA programs projects will have their own internal schedule management documents Issues that arise from conflicting schedule guidance will be resolved on a case by case basis as contracts and partnering relationships are established It is also acknowledged and understood that all projects are not the same and may require different levels of schedule visibility scrutiny and control Project type value and complexity are factors that typically dictate which schedule management practices should be employed
