Provided by publisher      **Readings in Computer Vision** Martin A. Fischler, Oscar Firschein, 1987-06 The field of computer vision combines techniques from physics mathematics psychology artificial intelligence and computer science to examine how machines might construct meaningful descriptions of their surrounding environment The editors of this volume prominent researchers and leaders of the SRI International AI Center Perception Group have selected sixty papers most published since 1980 with the viewpoint that computer vision is concerned with solving seven basic problems Reconstructing 3D scenes from 2D images Decomposing images into their component parts Recognizing and assigning labels to scene objects Deducing and describing relations among scene objects Determining the nature of computer architectures that can support the visual function Representing abstractions in the world of computer memory Matching stored descriptions to image representation Each chapter of this volume addresses one of these problems through an introductory discussion which identifies major ideas and summarizes approaches and through reprints of key research papers Two appendices on crucial assumptions in image interpretation and on parallel architectures for vision applications a glossary of technical terms and a comprehensive bibliography and index complete the volume      *Data Extraction and Classification from Film, August 23-24, 1977, San Diego, California* Robert D. Leighty, 1977      Advanced Solutions in Power Systems Mircea Eremia, Chen-Ching Liu, Abdel-Aty Edris, 2016-08-31 Provides insight on both classical means and new trends in the application of power electronic and artificial intelligence techniques in power system operation and control This book presents advanced solutions for power system controllability improvement transmission capability enhancement and operation planning The book is organized into three parts The first part describes the CSC HVDC and VSC HVDC technologies the second part presents the FACTS devices and the third part refers to the artificial intelligence techniques All technologies and tools approached in this book are essential for power system development to comply with the smart grid requirements Discusses detailed operating principles and diagrams theory of modeling control strategies and physical installations around the world of HVDC and FACTS systems Covers a wide range of Artificial Intelligence techniques that are successfully applied for many power system problems from planning and monitoring to operation and control Each chapter is carefully edited with drawings and illustrations that helps the reader to easily understand the principles of operation or application Advanced Solutions in Power Systems HVDC FACTS and Artificial Intelligence is written for graduate students researchers in transmission and distribution networks and power system operation This book also serves as a reference for professional software developers and practicing engineers      British Books in Print , 1985      **1985 IEEE Computer Society Workshop on Computer Architecture for Pattern Analysis and Image Database Management, Miami Beach, Florida, November 18-20, 1985** IEEE Computer Society, 1985      **Intelligent Data Security Solutions for e-Health Applications** Amit Kumar Singh, Mohamed Elhoseny, 2020-09-01 E health applications such as tele medicine tele radiology tele ophthalmology and tele diagnosis are very promising and have immense potential to improve global healthcare They can improve access equity and

quality through the connection of healthcare facilities and healthcare professionals diminishing geographical and physical barriers One critical issue however is related to the security of data transmission and access to the technologies of medical information Currently medical related identity theft costs billions of dollars each year and altered medical information can put a person's health at risk through misdiagnosis delayed treatment or incorrect prescriptions Yet the use of hand held devices for storing accessing and transmitting medical information is outpacing the privacy and security protections on those devices Researchers are starting to develop some imperceptible marks to ensure the tamper proofing cost effective and guaranteed originality of the medical records However the robustness security and efficient image archiving and retrieval of medical data information against these cyberattacks is a challenging area for researchers in the field of e health applications

**Intelligent Data Security Solutions for e Health Applications** focuses on cutting edge academic and industry related research in this field with particular emphasis on interdisciplinary approaches and novel techniques to provide security solutions for smart applications The book provides an overview of cutting edge security techniques and ideas to help graduate students researchers as well as IT professionals who want to understand the opportunities and challenges of using emerging techniques and algorithms for designing and developing more secure systems and methods for e health applications

**Investigates new security and privacy requirements related to eHealth technologies and large sets of applications** Reviews how the abundance of digital information on system behavior is now being captured processed and used to improve and strengthen security and privacy Provides an overview of innovative security techniques which are being developed to ensure the guaranteed authenticity of transmitted shared or stored data information

Electronics Division, 1989      *Computer Vision - ECCV ... , 1992*      Vision as Process James L. Crowley, Henrik I. Christensen, Alain Chehikian, 1995

**Scientific Visualization** Lawrence J. Rosenblum, 1994 Numerical simulations of global warming Mars observation data and aircraft design are but a few of the topics where the use of human visual perception for data understanding are considered essential Ten years ago a handful of pioneers professed the value of visualization to skeptical audiences Today with supercomputers and sensors producing ever increasing amounts of data scientific visualization is accepted throughout much of science and engineering as the fundamental tool for data analysis

Written by a world wide panel of visualization experts **Scientific Visualization Advances and Challenges** presents astute coverage of prevailing trends issues and practice of scientific visualization From algorithmic topics such as volume graphics and the modeling and visualization of large data sets to foundations perception and interface technology including virtual reality this book provides the latest advances in the area The book demonstrates new techniques examines diverse application areas and discusses current limitations and upcoming requirements **Scientific Visualization Advances and**

Challenges presents readers with a unique opportunity to examine expert thinking and current practice and to obtain a vision of potential future directions It will be essential reading for scientific and engineering practitioners and visualization researchers alike Offers extremely topical and timely coverage of a rapidly evolving area Includes contributions from an international panel of visualization experts in one accessible volume Provides scientific and engineering practitioners as well as visualization researchers with an essential guide to the literature

**IEEE International Conference on Fuzzy Systems** International Conference on Fuzzy Systems,1992      **The 14th IEEE International Conference on Automated Software Engineering** IEEE Computer Society,1999 Twenty five papers presented at the October 1999 conference are grouped into sessions having the broad topics of software synthesis requirements elicitation reuse test synthesis analysis verification transformation architecture and automated testing Among the topics are data mining library reuse patterns in user selected applications industrial applications of software synthesis via category theory automated translation of UML models of architectures for verification and simulation using SPIN verification of picture generated code evolving object oriented designs with refactorings automatically detecting mismatches during component based and model based development and an overview of Lutess a specification based tool for testing synchronous software There are also 25 short papers that represent novel work not yet fully mature No subject index Annotation copyrighted by Book News Inc Portland OR
