One Nation Under Taught Solving Americas Science Technology Engineering Math Crisis:

One Nation Under Taught Vince M. Bertram, 2014-11-18 Encourage students to fall in love with learning again by giving them the tools they need to succeed America has been steadily sliding in global education rankings for decades In particular our students are increasingly unable to compete globally in STEM science technology engineering and math fields According to the National Assessment of Education Progress NAEP in 2010 only 26 percent of high school seniors in the U S scored at or above proficient level in math Another 36 percent were failing Only 3 percent scored at an advanced level in math and only 1 percent scored at an advanced level in science The reason for this decline These subjects are often poorly presented or badly taught leading to students K 12 struggling to connect with the content One Nation Under Taught offers a clear solution providing a blueprint for helping students thrive in STEM subjects and giving them the tools needed to succeed and go on for further study in these fields The book challenges our whole way of thinking about education and encourages educators and policy makers at all levels to work together to make our schools places that promote curiosity and inspire a love of learning If we do not change course we will set our students and our country on the path to a lifetime of poverty But if we can implement the reforms Dr Bertram suggests we can achieve long lasting prosperity for our children and our nation as a whole
