Online Distance Education Margaret Gorts Morabito,1999 Many educators and the public are interested in online distance education in particular Internet based schooling The underlying assumption is that this is a new and untested fad in education This is due in part to a lack of documentation within academia of the early development of online distance education and in part to a shortage of experienced practicing online schools On the Internet one may become confused by the flurry of activity and by the various claims from organizations that they are providing a revolutionary method of instruction online teaching Furthermore many people are unaware of the long and distinguished history of distance education itself that is the root of current day Internet based schooling Despite the uncertainty the public is clearly demanding online distance education This dissertation helps to resolve these problems This study fills various needs for the purpose of showing the effective application of online distance education Educational administrators teachers and the public must be assured that online distance teaching is a valid and proven instructional method Furthermore administrators and teachers need to know what to expect when planning operating and teaching in an online school Through historical analysis and the presentation of a practicing Internet based school this study fills these needs This dissertation results from fifteen years of independent study and research by the author combined with professional experience in the field of online distance education including Internet based school design and operation Conclusions result from published studies in distance education from research conducted in the 1980s concerning publicly available online distance education and from experience in developing administrating and teaching in an international Internet based school that has been in continual operation online since 1986 The author concludes that 1 online distance education has a proven track record 2 there is continual demand from the global community for Internet based instruction as well as a public demand for traditional institutions to accept this nontraditional method of study and 3 administrators and teachers can economically create and operate an effective Internet based school that is accessible to and affordable for individual learners using low cost personal computers      **Online Predators** Mike Sullivan,2008-08 Parents will gain insight on how to assist their child in creating a safer profile and displaying appropriate images This book will help the reader choose software that can act as a virtual parent to supervise their child s activities

Online Business Security Systems Godfried B. Williams,2007-08-24 This book applies the concept of synchronization to security of global heterogeneous and hetero standard systems by modeling the relationship of risk access spots RAS between advanced and developing economies network platforms The proposed model is more effective in securing the electronic security gap between these economies with reference to real life applications such as electronic fund transfer in electronic business This process involves the identification of vulnerabilities on communication networks This book also presents a model and simulation of an integrated approach to security and risk known as Service Server Transmission Model SSTM
