**Intelligence Elites and Public Accountability** Vian Bakir, 2018-04-17 This book provides a definitive overview of the relationships of influence between civil society and intelligence elites The secrecy surrounding intelligence means that publication of intelligence is highly restricted barring occasional whistle blowing and sanitised official leaks These characteristics mean that intelligence if publicised can be highly manipulated by intelligence elites while civil society's ability to assess and verify claims is compromised by absence of independent evidence There are few studies on the relationship between civil society and intelligence elites which makes it hard to form robust assessments or practical recommendations regarding public oversight of intelligence elites Addressing

that lacuna this book analyses two case studies of global political significance The intelligence practices they focus on contemporary mass surveillance and Bush era torture intelligence policies have been presented as vital in fighting the Global War on Terror enmeshing governments of scores of nation states while challenging internationally established human rights to privacy and to freedom from torture and enforced disappearance The book aims to synthesise what is known on relationships of influence between civil society and intelligence elites It moves away from disciplinary silos to make original recommendations for how a variety of academic disciplines most likely to study the relationship between civil society and intelligence elites international relations history journalism and media could productively cross fertilise Finally it aims to create a practical benchmark to enable civil society to better hold intelligence elites publicly accountable This book will be of great interest to students of intelligence studies surveillance media journalism civil society democracy and IR in general

Internet Marketing Intelligence Edward Forrest, 2003 Table of contents      **Digital Citizenship Education** Divina Frau-Meigs, Brian O'Neill, Alessandro Soriani, Vitor Tomé, Janice Patricia Richardson, Elizabeth Milovidov, 2017 Most young people in Europe today were born and have grown up in the digital era Education authorities have the duty to ensure that these digital citizens are fully aware of the norms of appropriate behaviour when using constantly evolving technology and participating in digital life Despite worldwide efforts to address such issues there is a clear need for education authorities to take the lead on digital citizenship education and integrate it into school curricula In 2016 the Education Department of the Council of Europe began work to develop new policy orientations and strategies to help educators face these new challenges and to empower young people by helping them to acquire the competences they need to participate actively and responsibly in digital society This volume the first in a Digital Citizenship Education series reviews the existing academic and policy literature on digital citizenship education highlighting definitions actors and stakeholders competence frameworks practices emerging trends and challenges The inclusion of a wide selection of sources is intended to ensure sufficient coverage of what is an emergent topic that has yet to gain a strong foothold in either education or academic literature but has received wider policy attention      **Documentation Abstracts** , 2002      Current Law Index , 2007      **Ethics and Robotics** Rafael Capurro, Michael Nagenborg, 2009 Ethics and robotics are two academic disciplines one dealing with the moral norms and values underlying implicitly or explicitly human behavior and the other aiming at the production of artificial agents mostly as physical devices with some degree of autonomy based on rules and programmes set up by their creators Robotics is also one of the research fields where the convergence of nanotechnology biotechnology information technology and cognitive science is currently taking place with large societal and legal implications beyond traditional industrial applications Robots are and will remain in the foreseeable future dependent on human ethical scrutiny as well as on the moral and legal responsibility of humans Human robot interaction raises serious ethical questions right now that are theoretically less ambitious but practically more important than the possibility of the creation of moral machines that would be more than machines with an

ethical code The ethical perspective addressed in this volume is therefore the one we humans have when interacting with robots Topics include the ethical challenges of healthcare and warfare applications of robotics as well as fundamental questions concerning the moral dimension of human robot interaction including epistemological ontological and psychoanalytic issues It deals also with the intercultural dialogue between Western and Non Western as well as between European and US American ethicists P 4 of cover
