As the author of a treatise on ecology that brought him international recognition, he was able to inspire the first generation of 20th century European and American ecologists. His innovative approach to nature and his Arctic and tropical missions heralded the birth of a new science and an ecological awareness. As a professor at several Scandinavian universities during a period of intense debate and controversy over evolutionary theories, Eugen Warming vigorously asserted his convictions. *Birth of Scientific Ecology* presents the image of a man of knowledge and power recognized by his contemporaries as a founder of ecology and a player in the ecological project of the Kingdom of Denmark at a time when the empires were clashing.

*Expanding media histories* Sune Bechmann Pedersen, Marie Cronqvist, Ulrika Holgersson, 2024-01-31 Contemporary media history is a rapidly growing field that extends far beyond traditional studies of technology or institutions such as radio, film and television. This volume expands the scope further still to analyze ephemeral, mundane phenomena long overlooked by media historiography. In eight original essays, the volume demonstrates the strengths of a broad concept of the media. The first part centers on media systems and media events with studies of spiritist séances, Gallup polls, the mediated persona of Kaiser Wilhelm II and the burial of a Swedish elder statesman in 1915. The second part focuses on media materialities and infrastructure such as art replicas, ring binders, tourist guidebooks and media technology in the IKEA home. Aimed at students and academics alike, *Expanding Media Histories* offers new empirical research which engages critically with key concepts in media history today.
