### **Remote Learning and Distance Education** William H. Pruden III,2024-11-14

Remote learning and distance education burst into the national consciousness with the onset of the COVID 19 pandemic yet it remains poorly understood in many ways Explore a range of debates around this timely topic including can remote learning

models of educational instruction produce the same or better academic results than in school learning. What are the socialization impacts of remote learning? What do education experts think is the next frontier in remote learning? This book explores those questions and many more. *Remote Learning and Distance Education* provides the historical background and context for understanding the origins and evolution of distance education, an evolution which was accelerated dramatically and in unpredictable ways when the COVID 19 pandemic transformed millions of actual classrooms into virtual ones. Readers will better understand the problems, controversies, and solutions surrounding distance education from access and equity issues to maintaining academic integrity. Profiles of key figures and organizations such as Khan Academy give readers an introduction to important players in this potentially revolutionary approach to teaching and learning.

### **Teacher Education and Professional Development In Industry 4.0**

Ashadi, Joko Priyana, Basikin, Anita Triastuti, Nur Hidayanto, Pancoro Setyo Putro, 2020-10-20. The main theme of the proceedings of the 4th International Conference on Teacher Education and Professional Development InCoTEPD 2019 is Teacher Education and Professional Development in Industry 4.0. The papers have been carefully grouped under the subthemes of teacher education and professional development, curriculum learning materials, teaching learning process, technology and media, and assessment in Industry 4.0 education. They also cover vocational education in the era in question and one section is devoted to Industrially disadvantaged societies. As these papers were presented at an internationally refereed conference dedicated to the advancement of theories and practices in education, they provide an opportunity for academics and professionals from various educational fields with cross disciplinary interests to bridge the knowledge gap and promote research esteem and the evolution of pedagogy.

### **Design for Change in Higher Education**

Jeffrey T. Grabill, Sarah Gretter, Erik Skogsberg, 2022-03-01. It's time to design the next iteration of higher education. There is no question that higher education faces significant challenges. Most of today's universities aren't prepared to tackle issues like demographic change, the continued defunding of public education, cost pressures and the opportunities and challenges of educational technologies. Then of course there is the shock of the COVID 19 pandemic which will reverberate for years and may very well usher higher education into an era of significant structural change. Some critics argue that a premium should be placed on change functions that is to say on creativity, innovation, organizational learning and change management. Yet few institutions of higher education have functions focused on thoughtful, iterative problem solving and opportunity identification. The authors of *Design for Change in Higher Education* argue that we must imagine and actively make our way to new institutional forms. They assert that design a practical art that is conceptually rich and visible in its concreteness must become a core internal competency of the university. They propose one grounded in the practical experiences of a specific educational design organization, Michigan State University's Hub for Innovation in Learning and Technology, which all three authors have helped to run. The Hub was created to address issues of participation, impact and scale in moving learning innovations from the individual to the collective and from the classroom to the institution. Framing

each chapter around a case study of design practice in higher education the book uses that case study as the foundation on which to build design theory for higher education It is complemented by an online playbook featuring tactics that can be used and adapted by others interested in facilitating their own design work Touching on learning experience design LXD as an increasingly critical practice the authors also develop a constructivist view of designing conversations A playbook that grounds theory in practice Design for Change in Higher Education is aimed at faculty staff and students engaged in the important work of imagining new forms of education *The Education Ecology of Universities* Robert A. Ellis,Peter Goodyear,2019-03-26

Many universities around the world are finding that the structures and processes they have put in place to further their educational missions are being tested by rapidly changing circumstances These changes involve new pedagogies new course designs new technologies and updating of the physical campus reflecting diversifying student needs growing student numbers increasing competition and more demanding stakeholder expectations The Education Ecology of Universities examines these issues starting with the challenges identified by university leaders who have responsibility for education digital and campus planning Sharing an analysis of in depth interviews with more than 50 leaders it identifies a range of conceptual and procedural gaps that undermine the full development and alignment of education digital and campus strategies The second half of the book provides practical ideas for taking a more holistic indeed ecological approach to understanding and improving university learning environments Setting out a case for a new applied science of educational ecology this book offers foundational concepts and theoretical perspectives introducing methods for analysing and evaluating teaching and learning ecosystems It will be of interest to anyone who wants better ways of understanding how local systems function and can be improved It is a must read text for all leaders and researchers in education and indeed for anyone concerned with the future of higher education
