Symeonidis,2023-11-14 The world is moving away from demand driven electricity markets supplied by centralized generation and distribution of fossil fuel produced electricity Increasing reliance on weather dependent renewable sources will require a shift toward a supply driven paradigm while beneficial electrification including

widespread adoption of electric vehicles heat pumps and batteries will offer considerable but widely distributed demand flexibility that can be used to compensate for supply variability The open source Power Trading Agent Competition Power TAC platform simulates a decentralized future modeling the high complexity of future retail electricity markets This book describes a variety of approaches to profitable trading in realistic wholesale and retail electricity markets It presents actionable insights from extensive exploration of policies and business models for retail electricity markets gained from a decade of Power TAC tournaments and from research inspired by the Power TAC experience Featuring contributions from tournament designers competitors and scientists combining best practices from computer science and economics and management science this book is of benefit to academics researchers practitioners and policy makers in sustainable energy and wholesale and retail electricity markets

Electric Charging Intended Functionality, Availability, and Equity

Inclusion Brian J. Kozumplik,2023-01-19 As unprecedented growth in EV sales is expected and the number of public charging stations must be planned accordingly as charger up time and functionality i e availability is the number one factor for users once the charging system is installed Electric Vehicle Intended Functionality Availability and Equity Inclusion informs current customers and potential purchasers of functionality availability and equity inclusion issues with EV charging systems currently in production and in use across North America and Europe Note that if shortages of available chargers are recognized and exposed across the US this could then have a negative impact on future potential EV customers from making the leap from traditional ICE vehicles to EVs Click here to access the full SAE EDGETM Research Report portfolio <https://doi.org/10.4271/EPR2023001>

Nichols, 2024-03-05 From the adolescent thrill of getting a driver's license to the dreaded commutes of adulthood from vintage muscle cars to electric vehicles this groundbreaking book reveals the outsized impact the car has had and will continue to have on the lives of women. Since their inception cars have defined American culture but until quite recently car histories were largely written by and about men with little attention given to the fascinating story of women and cars. In this engaging non-fiction narrative Nancy A. Nichols, the daughter of a used car salesman, uses the cars her father sold and the ones her family drove to tell a larger story about how the car helped to define modern womanhood. From her sister's classic Mustang to her mother's Chevy Convertible to her own Honda minivan, Nichols tells a personal story in order to shed light on a universal one. Cars helped women secure the right to vote, changed the nature of romance, and influenced both fashion and child-rearing customs. In the just over 100 years since their inception, cars have created possibilities for commerce and romance even as they exposed women to new kinds of danger. Women Behind the Wheel explores the uniquely gendered landscape of the automobile, detailing the many reasons why cars are both more expensive and more dangerous for women drivers. The automobile is on the cusp of momentous change. As we advance into the era of electric, connected, and autonomous vehicles, Nichols shows us why we should hit the brakes and look back in the rear view mirror at this long and fascinating history. What is the role of the car in our lives? Should we be more skeptical of technology in our society? In Women Behind the Wheel, Nichols argues convincingly that only by understanding the many ways the car has changed us can we hope to prepare ourselves for this brave new era.

2011-2012 Investment Plan for the Alternative and Renewable Fuel and Vehicle Technology Program, 2011 **Build Your Own Electric Vehicle, Third Edition** Seth Leitman, Bob Brant, 2013-02-19 Discusses the benefits of electric vehicles, describing each component and including step-by-step instructions for assembling the parts.
