### **The Model of Ramadan Diurnal Intermittent Fasting: Unraveling the Health Implications, volume III**

MoezAlIslam Ezzat Faris, Faiza Kalam, Ahmed S. BaHammam, Meghit Boumediene Khaled, Hamdi Chtourou, Dana N.

Abdelrahim, 2025-04-28 Intermittent fasting IF is rapidly gaining interest across scientific disciplines and also in the general community. The practice of IF is a safe and costless measure that offers health improvement and disease prevention in particular in the context of chronic metabolic diseases. One of the most commonly practiced models of IF at the global level is the religious form of obligatory intermittent fasting observed annually in the month of Ramadan by about 1.5 billion Muslim people. A growing body of literature accumulated during the last two decades provides evidence that observing this one-month religious fasting lasting between 12-17 hours a day depending on the location and season provides metabolic and physiological benefits. The many health benefits of Ramadan Intermittent Fasting (RIF) include improvements in body weight, body composition, reducing complications of metabolic syndrome, improving lipid profile and other cardiometabolic risk factors. Further, RIF helps improving glucose homeostasis, ameliorating inflammatory and oxidative stress markers, and modulating gene expression of various components of the anti-inflammatory and antioxidant defense systems. Despite being the most extensively studied form of IF, many gaps remain in our understanding of the versatile effects of RIF in healthy people, including athletes. Further, it is unclear how the observance of RIF affects patients with illnesses such as diabetes, cardiovascular disease, and cancer. More information is needed on the effects of RIF on different body systems and the possible epigenetic changes produced by this religious practice. A better understanding of RIF will help to optimize the practice of RIF, maximize its health benefits, and guide healthcare providers to better advise their chronically ill patients on matters related to Ramadan fasting.

**The Spiritual Practices of South African Clergy** Shaun Joynt, 2024-12-15 Clergy play an important role in the spiritual wellbeing of their congregation. They are entrusted by the Great Shepherd to shepherd his flock, which entails leading them to green pastures and still waters, for example, pastoral care and defending them from predatory animals, for example, heresy. However, clergy are sheep before they are shepherds and are also in need of the green pastures and still waters of meditation, prayer, fasting, and Bible study. These are known as inward spiritual disciplines, exercises, and have been practiced for centuries. *Spiritual Practices of South African Clergy* State of the Clergy discusses these inward spiritual disciplines, mental, physical, spiritual, and social benefits. The volume explores how clergy from five diverse denominations practice these specific

inward spiritual disciplines They include the Methodist Netherdutch Pentecostal Presbyterian and Roman Catholic faith traditions This book focuses on clergy in the Global South and how they practice these spiritual disciplines within their context Clergy congregants academics and lay persons alike will benefit from the research conducted , *Bulletin of the British Psychological Society* British Psychological Society,1972 **A Study of prolonged fasting** Francis Gano Benedict,1915 **Physiologia Bohemoslovaca** ,1974 **Journal** American Dietetic Association,1946 **Journal of the American Dietetic Association** ,1946 *The Medical circular [afterw.] The London medical press & circular [afterw.] The Medical press & circular* ,1876 **The Lancet** ,1878 **The South African Medical Record** ,1922 **The Medical Times and Gazette** ,1870 Book Review Digest ,1924 *Medical Times* ,1870 **Medical Journal of Australia** ,1917 *The London Medical Record* ,1880 *New York Journal of Homœopathy* ,1899 **Medical Record** Ernest Abraham Hart,1880 *British Medical Journal* ,1913
