 book is about a better future Patrick Callioni identifies and describes the major waves of change that are coming our way
 over the next decade or so and then provides practical advice on what to do or avoid doing to benefit most or suffer least
 from what is to come He describes some of the problems with the present regime of regulation We are regulating to catch
 the motes of dust floating in the air rather than the beams that end up poking out the eyes of our financial markets and
 suggests regulation should focus on rewarding the good rather than punishing the bad He also analyzes some of the behavior
 that helped to create the Credit Crunch They took healthy debt mortgage debt that was likely to be repaid mixed it up with
 toxic debt mortgage debt not likely to be repaid and then sold the debt on as prime safe debt creating untold damage Then
 he presents the waves of change that are coming the challenges of new technologies the business opportunities opened by
 reactions to climate change and demographic changes as workers and managers are no longer predominantly baby boomers
 He also warns of future signs of impending financial setbacks that should be avoided A financial crisis will occur only when
 the fuel is there in the form of an investment bubble In his previous book Compliance and Regulation in the Financial
 Services Industry Patrick Callioni successfully predicted most of the course of the current economic downturn Over
 regulation is as dangerous as under regulation so he proposes the creation of a federated network of trust Throughout this
 exciting book he emphasizes the increasing importance of knowledge capital value that is not captured by existing
 accounting standards and in particular soft intangibles knowledge assets time assets motivational assets etc and he proposes
 guidance on their measurement and profitable management Commercial and Financial Chronicle Bankers Gazette.
