The Parmenidean Ascent Michael Della Rocca, 2020-06-19 For the Parmenidean monist there are no distinctions whatsoever indeed distinctions are unintelligible In The Parmenidean Ascent Michael Della Rocca aims to revive this controversial approach on rationalist grounds He not only defends the attribution of such an extreme monism to the pre Socratic philosopher Parmenides but also embraces this extreme monism in its own right and expands these monistic results to many of the most crucial areas of philosophy including being action knowledge meaning truth and metaphysical explanation On Della Rocca s account there is no differentiated being no differentiated action knowledge or meaning rather all is being just as all is action all is knowledge all is meaning Motivating this argument is a detailed survey of the failure of leading positions both historical and contemporary to meet a demand for the explanation of a given phenomenon together with a powerful original version of a Bradleyan argument against the reality of relations The result is a rationalist rejection of all distinctions and a skeptical denial of the intelligibility of ordinary relational notions of being action knowledge and meaning Della Rocca then turns this analysis on the practice of philosophy itself Followed to its conclusion Parmenidean monism rejects any distinction between philosophy and the study of its history Such a conclusion challenges methods popular in the practice of philosophy today including especially the method of relying on intuitions and common sense as the basis of philosophical inquiry The historically minded and rationalist approach used throughout the book aims to demonstrate the
