Mapping Power Navroz K. Dubash, 2018-08-22 Electricity is critical to enabling India s economic growth and providing a better future for its citizens In spite of several decades of reform the Indian electricity sector is unable to provide high quality and affordable electricity for all and grapples with the challenge of poor financial and operational performance To understand why Mapping Power provides the most comprehensive analysis of the political economy of electricity in India s states With chapters on fifteen

states by scholars of state politics and electricity this volume maps the political and economic forces that constrain and shape decisions in electricity distribution. Contrary to conventional wisdom it concludes that attempts to depoliticize the sector are misplaced and could worsen outcomes. Instead it suggests that a historically grounded political economy analysis helps understand the past and devise reforms to simultaneously improve sectoral outcomes and generate political rewards. These arguments have implications for the challenges facing India's electricity future including providing electricity to all implementing government reform schemes and successfully managing the rise of renewable energy.

**Negotiating Marginality** Mahana Rajakishor, 2019-03-01. Providing a critical ethnography of five different tribal movements fighting against the mega industrialization projects in Odisha, India, the book presents a thick description of the confrontation of the tribals to the authoritative forces of state domination. This confrontation, a counter-hegemonic discourse, is neither antagonistic to change nor anti-development but rather, in fact, the author argues that the tribals are the subaltern citizens who aspire for not only more material and economic prosperity but also freedom from domination and deprivation. The book therefore seeks to answer one important question: how do the tribals appropriate marginality in their everyday lives in challenging domination and celebrating their desires, wishes, anticipations, and material prosperity as well as in coping with the ruins of frustration and suffering. Drawing on long-term ethnographic fieldwork carried over a decade (2006-16), this book provides empirical evidence and conceptual explorations on the resistance of subaltern citizens against domination. The author challenges current theories of social movements which claim that a cultural critique of the development paradigm is writ large in the political actions of those marginalized by development: tribals who lived in harmony with nature, combining reverence for nature with the sustainable management of resources. On the other hand, questioning the established notion of marginality as a problem, the author revisits marginality as a possible site that nourishes the capacity of the tribals to resist and to imagine and create a new world. The complexity of tribal politics then cannot be reduced to an opposition between development and resistance. The book therefore persuades us to re-examine the politics of representation within the ideology of progressive movements.
