

# WHAT IS AN OMNIVORE?

An **omnivorous animal** is one that feeds on both plant and animal-based foods.

Their diet is varied and may include fruits, vegetables, insects, meat, and other resources available in their environment.

**Omnivorous** animals have dental and digestive adaptations that allow them to process and digest both plant and animal material.

Some examples of omnivorous animals are bears, pigs, rats, humans, and some primates. This dietary flexibility allows them to take advantage of a wide range of food resources and adapt to different environmental conditions.
