**On Becoming Baby Wise, Book Two** Gary Ezzo, Robert

Bucknam, 2012-02-01 It's reality check time. You're at least four months into your tour of parenting and the complexities of child training are starting to multiply. While your baby is growing physically, his mind is adapting with ever increasing awareness to new sights, sounds, sensations and relationships. He can now interact with his material universe with greater attentiveness. Watch out: big changes are coming to his world and yours. Preserving the order and structure that brought security to your baby's day peaceful sleep in your baby's nights and stability in your home is still the priority, but now it must be viewed through a new developmental lens. For example, feeding time is more than a biological response initiated by a baby's sucking reflex. For the five month old, meal times become a complex and conscious interaction between him and his parents' food and drink preference and need likes and dislikes. must dos and won't dos
