**How Video Games Made the Metaverse** Kelly Vero, 2026-01-22 This book offers an unflinching look at the creative and structural challenges of storytelling in interactive media. Drawing on over 30 years of industry experience, Kelly Vero explores the rich interplay between narrative design and technology, making the case for why story is far from being a cosmetic layer. It is foundational to player engagement, emotional investment, and lasting value in games and virtual worlds. The book unpacks how narrative design works across different genres and platforms, from AAA games and sandbox titles to immersive metaverses, offering a toolkit of questions and techniques to help creators build experiences that resonate. Vero brings the reader inside the design process, examining iterative workflows, empathy versus hypothesis testing, and the importance of building for diverse, evolving user bases. She draws from case studies including The Legend of Zelda, BTS Universe Story, Final Fantasy XIV, and even RuneScape's infamous party hat, showing how stories are told not just through dialogue but also through User Interface, UI, environment mechanics, and player choice. Crucially, *How Video Games Made the Metaverse* From Pixels to Portals is about building worlds that people want to live in. Whether you're a product lead, a writer, or a designer, this book explores how to integrate content, interaction, and community into a unified whole. It challenges creators to abandon ego-led development and instead embrace deep user understanding as the compass for creative direction. By the end, readers will understand how to apply storytelling techniques not only to games and metaverses but also to digital products more broadly, from loyalty programmes and education platforms to virtual retail and Artificial Intelligence AI companions. Vero's reflections on narrative purpose and legacy offer a roadmap for creating digital experiences that matter, not just ones that entertain.

*The Routledge Handbook of Fan Video and Digital Authorship* Louisa Ellen Stein, Samantha Close, 2025-10-31 This cutting-edge collection explores the histories, aesthetics, and cultural work of fan video across a wide variety of manifestations and genres. Editors Louisa Ellen Stein and Samantha Close have assembled an edited collection that showcases the aesthetic diversity and transcultural dynamics at play in fan video as a widespread form. The collection explores the relationships between fan video as a set of DIY subcultural authorship forms and the broader, evolving popular cultures of digital media, looking at how fan video structures and aesthetics influence other popular and commercial forms of digital video. In order to do so, it examines a wide range of fan video genres and practices, including vidding, reaction videos, self-insert TikToks, ASMR videos, Let's Play videos, streams, Bilibili videos, gif loops, fan films, crack videos, animatics, collection videos, deepfakes, fake trailers, and fan video essays, among others. It features chapters by a range of scholars working in the intersecting fields of digital media studies, fan studies, media studies, cultural studies, audience studies, video game studies, transcultural studies, and videographic studies. A field-defining collection, this *Handbook* will be of interest to students and scholars of digital media studies, fan studies, media studies, cultural studies, videographic studies, and beyond.
