**The Handbook for the Future of Work** Julie MacLeavy, Frederick Harry Pitts, 2024-12-26 The Handbook for the Future of Work offers a timely and critical analysis of the transformative forces shaping work and employment in the twenty first century. Focusing on the past two decades the handbook explores how technological advancements, automation and a shifting capitalist landscape have fundamentally reshaped work practices and labour relations. Beyond simply outlining the challenges and opportunities of automation the handbook integrates these emerging realities with established discussions of work. Importantly it moves beyond dominant technology centric narratives probing into broader questions about the nature of capitalism in a time of crisis and the contestation for alternative economic models. With contributions from established and emerging authors based in institutions around the world the handbook offers a systematic overview of the developments that have sparked radical shifts in how we live and work and their multifaceted impacts upon social relations and identities, practices and sectors, politics and environments. The handbook is unique in its exploration of the potential for economic transformations to reshape the centrality of work in our social and political imaginaries. A useful resource for students and researchers the handbook serves as an essential guide to this new intellectual landscape
