*Innovative Technology at the Interface of Finance and Operations* Volodymyr Babich, John R. Birge, Gilles Hilary, 2022-06-09 This book examines the challenges and opportunities arising from an assortment of technologies as they relate to Operations Management and Finance. It contains primers on operations finance and their interface. Innovative technologies and new business models enabled by those technologies are changing the practice and the theory of Operations Management and Finance as well as their interface. These technologies and business models include Big Data and Analytics, Artificial Intelligence, Machine Learning, Blockchain, IoT, 3D printing, sharing platforms, crowdfunding, and crowdsourcing. The book will be an attractive choice for PhD level courses and for self study.

[Reforming Occupational Licensing in the US](#) Clifford Winston, 2024-12-28 Nearly one third of US workers must obtain a license from a government agency to perform their jobs legally. This impacts employees across all areas including lawyers, doctors, and accountants as well as florists, hairdressers, physical therapists, and plumbers. The justification for occupational licensing is that potential consumers allegedly lack the information and knowledge to judge the competence of a service provider. This necessitates a licensing system built to ensure that customers are served by people who have received adequate training and certification in their profession. While there are recognizable benefits of occupational licensing, the training and certification requirements create barriers to entry for employees or those entering the profession. These barriers can limit competition, raise service costs, and restrict consumer access to essential services. Recent empirical work suggests that consumers have incurred these costs without being adequately protected from incompetent or unscrupulous service providers. This book addresses this situation head on. In light of occupational licensing's shortcomings, the authors of this book propose and analyze constructive reforms assessing their effects on key professions such as law, medicine, and finance. Chapters identify the significant costs of current policies and they recommend practical reforms that rely more on market forces. The resulting book provides new ways to reduce licensing costs without compromising service quality.

**El-Hi Textbooks in Print**, 1984 *School Children and the Challenge of Managing AI Technologies* Emanuela Guarcello, Abele Longo, 2024-06-14 This edited volume recognises the need to cultivate a critical and acute understanding of AI technologies amongst primary and elementary school children, enabling them to meet the challenge of a human and ethically oriented management of AI technologies. Focusing on school settings from both the national and international level to form comparative case studies, chapters present a robust conceptual and foundational framework within a global context as the idea of AI and our relationship to it advances apace. The book uses research garnered from interviews and observational data, qualitative and quantitative research, and theoretical findings.

gathered from single schools or institutions across the world Providing an innovative perspective in promoting the importance of a critical creative and ethical orientation based on aesthetic experiences the book focuses on development in areas like visual arts literature environmental education robotics photography and screen education movement and play Ultimately the book responds to an urgent and time sensitive call to provide guidance on AI to primary education researchers and will be of interest to academics scholars and researchers in the fields of primary and elementary education technology in education children s rights education and moral and values education more broadly *Iron and Machinery World* ,1899
