Smart Cycles Gabriel Barnes, AI, 2025-03-04 Smart Cycles introduces a unique approach to time management and productivity by using strategic scheduling cycles. This method helps readers break free from ineffective linear planning. The core of the book emphasizes optimized productivity through rhythmic scheduling and workload balancing, fostering sustainable progress. It challenges the always-on work culture by integrating work and rest periods, enhancing effectiveness and preventing burnout. The book progresses by first introducing the concepts of cyclical scheduling and their scientific basis. Then it explores identifying personal and professional rhythms, applying cyclical scheduling in various contexts, and monitoring progress. Drawing from historical precedents and research in chronobiology, Smart Cycles highlights how strategically planned cycles of work, rest, and reflection can foster resilience and enhance creativity. Unlike productivity books focused solely on maximizing output, this book offers a holistic approach considering long-term well-being.

## **Global Media Giants**

**Giants** Benjamin Birkinbine, Rodrigo Gomez, Janet Wasko, 2016-07-01 Global Media Giants takes an in-depth look at how media corporate power works globally, regionally, and nationally, investigating the ways in which the largest and most powerful media corporations in the world wield power. Case studies examine not only some of the largest media corporations (News Corp, The Microsoft Corporation) in terms of revenues but also media corporations that hold considerable power within national, regional, or geolinguistic contexts (Televisa, The Bertelsmann Group, Sony Corporation). Each chapter approaches a different corporation through the lens of economy, politics, and culture, giving students and scholars a thoughtful and data-driven guide with which to interrogate contemporary media industry power.

## **Lost in Perfection** Vera King, Benigna Gerisch, Hartmut Rosa, 2018-07-16

The demand for improved performance and efficiency, as well as the pursuit of self-improvement, are considered necessary in order to keep pace with an accelerated competitive modernity. This affects not only work and education but also family life, parent-child relationships, and intimate relationships in respect to the body and the self, in regard to the public as well as the private realm. Bringing together contributions from renowned scholars from the fields of sociology, psychology, and psychoanalysis, this book explores the impacts of optimisation on culture and psyche, examining the contradictions and limitations of optimisation in conjunction with the effects of social transformations on individuals and shifts in regard to the meaning of pathology and normality.
