## START HERE

It is strongly recommended that you follow these step-by-step numbered instructions to set up and quickly begin using your new Digital camera.

For more detailed instructions on advanced features, please refer to the printed Basic Manual included in your package, or the Reference Manual on the CD-ROM.

## 1 UNPACKING THE BOX CONTENTS

Gather your Digital camera and the parts as shown in the illustration. You'll need these to complete the steps for the camera set-up procedures that follow.

The following items are also included in the Digital camera package: Basic Manual, AV cable, IR remote control, warranty card, registration card (not provided in some areas), and battery precautions booklet.

➤ **Note:** In some areas **NIMH** rechargeable batteries and charger will be included in the package instead of **CR-V3** batteries. Please refer to "Battery charger" instructions included with the battery charger.

## 2 PREPARING THE CAMERA FOR USE

Before you begin using your Olympus Digital camera...

### a. Loading the Batteries

➤ **Note:** The batteries and xD-Picture Card compartments are protected by opening the respective compartment covers.

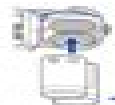

- Slide the battery compartment lock from **LOCK** to **OPEN**.
- Slide the battery compartment cover in the direction of the arrow, and lift open the cover.

- Insert two CR-V3 lithium batteries into the compartment with their indentations facing each other.

OR

- Insert the rechargeable batteries into the compartment as indicated in the illustration on the camera body.

- Close the battery compartment cover and slide the battery compartment lock from **OPEN** to **LOCK**.
- To remove the batteries, make sure that the camera is turned off (the monitor and the viewfinder are off and the lens is not extended).

### b. Inserting the xD-Picture Card

The xD-Picture Card is where the camera stores your pictures and is available in a variety of memory capacities. The pictures you take with the camera remain on the xD-Picture Card even when the camera is turned off and/or the batteries are removed.

- Open the card cover.
- Place the card the correct way and insert it into the spring-loaded card slot as shown in the illustration. Push the card fully into the slot. The card will lock into place when fully seated.
- Close the card cover securely.

Confirm you have installed the batteries and xD-Picture Card properly by setting the mode dial to **RE** and pressing the power switch. The "No Picture" message should be displayed in the monitor. Turn the camera off by pressing the power switch again.

➤ **Note:** To remove, push the card all the way in to unlock it, then lift it out slowly.

### c. Attaching the strap and lens cap string (optional)

Attach the lens cap string and snap to the strap eyelets on each side of the camera as illustrated. Attaching the strap to the camera makes it easier to handle.

## 3 TURNING ON THE CAMERA

The camera Mode dial is used to select the various operation modes.

### a. Turning the camera ON (switches on)

- Press the tabs on the lens cap to remove it.
- Set the mode dial to **RE**. Press the power switch. The lens extends and the viewfinder turns on.
- To turn the camera off, press the power switch again.

To maximize battery life, the Digital camera's battery power-saving mode is active when the camera enters a sleep mode after approximately three (3) minutes of inactivity.

### b. Setting the Date and Time (optional)

Set the date and time before using the camera for the first time. This affects the way image file names are created, and will conveniently include this information with each picture.

- Set the mode dial to **P** and press the power switch to turn the camera on.
- Press **DISP**. The top menu is displayed.
- Press **DISP** on the arrow pad to select **MODE MENU**.
