1. Using the links in "Activities and Resources", especially the Crash Course videos, develop a chart to compare and contrast prokaryotic cells from eukaryotic cells.
2. Describe the smallest unit of life and distinguish between unicellular and multicellular organisms. Give multiple examples of each.
3. List the major organelles and structures of a eukaryotic cell and describe the function of each part.
4. List and describe the major parts of a light microscope. Also arrange the parts of the microscope tracing the light source through the scope.
5. List and describe the structure and composition of the cell membrane. What is the function of the cell membrane?
6. What is a concentration gradient? Define the terms hypotonic, isotonic, and hypertonic. Explain the direction of the solute and the solvent in each case.
7. Compare and contrast between passive and active transport. Present at least 2 examples of passive transport and 2 examples of active transport. Develop a table to present this information.
8. Describe the function of Na/K ATPase. Include the general type of transport it performs, the stimulus it uses to change shape and the direction it moves ions.
9. List and describe 3 forms of endocytosis. Include the substance moved by each and whether or not the process is specific.
10. Compare and contrast diffusion and osmosis. Develop a table to present this information.
11. Using course materials explain the factors that effect the rate of diffusion through a membrane.
