# THE RISE OF STREAMING SERVICES

The Rise of Streaming Services

Streaming services have become a major player in the entertainment industry, offering users the option to stream movies, TV shows, and other content without having to own a physical copy. This has led to a shift in the way people consume media, with more people turning to streaming services for their entertainment needs.

**Definition of Streaming:**

Streaming refers to the process of delivering content to a user in real-time, allowing them to view or listen to the content as it is being transmitted. This is in contrast to traditional media formats like DVDs or CDs, which require the user to purchase the content and then store it on their device.

**Impact on Traditional Media:**

The rise of streaming services has had a significant impact on traditional media, particularly in the movie and TV industry. Many studios and networks have struggled to compete with the convenience and affordability of streaming services. This has led to a shift in the way studios and networks approach their content, with more focus on creating content that is specifically designed for streaming platforms.

**Key Features of Streaming Services:**

Streaming services offer several key features that set them apart from traditional media. These include on-demand viewing, which allows users to watch content whenever they want; the ability to pause and resume viewing; and the option to download content for offline viewing.

**Challenges and Future of Streaming:**

Despite the popularity of streaming services, there are several challenges that the industry faces. These include the cost of content creation and distribution, as well as the need to constantly innovate and adapt to changing consumer preferences.

readers they regarded themselves as poor learners and their verbal responses were less elaborate 4 poor readers decoding was often not automatic leaving less capacity for comprehension 5 the gap between good and poor readers widened from grade 5 to grade 8 as more independent reading was expected of students and 6 the younger students believed they would improve the older students lost interest in studies Findings suggest that poor and good readers differ in the way they process text information and monitor their cognitive functions Contains over 200 references in addition to 19 tables and 5 figures of data Appendixes present the interview questionnaire examples of categorizations the texts and sample student responses rs
